A

Accuracy
- the problem of – in environmental analysis 678
- validitation of – by interlaboratory program 175

2-Acetamido-2-deoxyhexose
- stereoisomer differentiation of – by mass spectrometry 198

Acetaminophen
- detmn. of –, salicylamide and codeine phosphate by pH-induced difference spectrophotometry 90

Acetol
- detmn. of – in blood serum by HPLC 194

Acid anhydrides
- detmn. of diisocyanates and –, phthalic anhydride in air by HPLC 80

Acids
- extract. of molybdenum(VI) from aqueous mineral – using di-(2-ethylhexyl)phosphate 137

Activation analysis, neutron
- multielement analysis of environmental samples by spectrometry, X-ray fluorescence, total reflection, – and spectrometry, ICP-OES 662

Activation analysis, thermal neutron
- in multielement analysis, geological materials, environmental materials, high-purity materials 649

Adenine nucleotides
- analyser for – 99

Adsorption isotherms
- detmn. of – by chromatography, frontal 69

Aerosols
- in spectrometry, flame atomic, cascade impaction technique, spray chamber, aerosol ionic redistribution interference 846
- spectrometry, flame atomic, prim., sec., tert. –, nebulization efficiency, drop size distribution, votalization interference 846

Agricultural chemistry
- X-ray fluorescence analysis in –, plants, feeds, fertilizers, soils, sludges, water and others 720

Air
- detmn. of anions in – by HPLC, after adsorption in Liesegang filters 79
- detmn. of antimony in –, particulates by AAS/hydride generation 79
- detmn. of carbonyl sulfide in – by capillary GC, derivatization with 1,3-diaminopropane 79
- detmn. of diisocyanates and acid anhydrides, phthalic anhydride in – by HPLC 80
- detmn. of formaldehyde in – by polarography 80
- detmn. of isocyanates, organic in –, review 80
- detmn. of sodium tetrahydroborate in – by coulometric titration 80
- spectrometry, IR for measurement of trace gases in –, air pollution and atmosphere, upper using ballon-borne spectrometer and long path cells 579
- trace anal. of iodine in – with iodide-selective electrode 79

Airborne particulates
- detmn. of hydrocarbons, polycyclic aromatic in – by GC 83
- detmn. of volatile compounds in – by GC, rapid sampling 79

Airborne particulates
- environmental analysis, –, soils, sediments, rain, sea and river water, organic matter 662

Air pollution
- spectrometry, IR for measurement of trace gases in air, – and atmosphere, upper using ballon-borne spectrometer and long path cells 579

Albumin derivative
- containing aldehyde residues 276

Albumin, glycosylated
- detmn. of – in blood serum by fluorimetry 96

Alcohols
- sepn. of enantiomers of – and ketones by capillary GC with selective complexation 179

Aldehydes
- albumin derivative containing – residues 276

Aldehydes, aromatic
- sepn. of monosubstituted – as 2,4-diphenylhydrazones by HPLC 181

Aliquat 336S
- sepn. of scandium as citrate complex by extr. with – 75

Alkylbenzenes
- detmn. of – in environmental samples by column chromatography 189

Alkylphenol polyethoxylates
- detmn. of – in waste water by HPLC 189

Alkylphenols
- detect. of phenol and – at workplaces 142

Alkylsulfates
- detmn. of tensides, – and alkylsulfosuccinates by chromatography, reversed phase, ion-pair 154

Alkylsulfosuccinates
- detmn. of tensides, alkylsulfates and – by chromatography, reversed phase, ion-pair 154

Alloys
- anal. of corrosion and oxidation, surface analysis of steel, Cr-Ni – and metals by spectrometric methods, depth profiles 625
- detmn. of niobium in – with triazene-N-oxides by fluorimetry 77
- multielement analysis of metals, –, steel by spectrometry, optical atomic emission, spark source, arc source, d.c. arc, review 793

Alumina
- sepn. of microamounts of fluoride coexisting with large amounts of – and silica, geological materials by TMS distillation 186

Aluminum
- anal. of chromate coatings on – by radiotracer technique and ion-exchange 183
- anal. scheme for speciation of – in natural water 188
- potentiometric sensing system for – 75
- sepn. of uranium(VI), –, strontium, barium and mercury(II) by cation exchange chromatography in aqueous ammonium acetate 66

Aminacrine
- detmn. of – hydrochloride in pharmaceutical products by TLC with fluorescence detection 93

Amines
- Ullmann's encyclopedia of industrial chemistry, Vol. 2 A, – to antibiotics 168

Amines, enantiomeric
- detmn. of – in amphetamine by reversed-phase HPLC, derivatization 93

Amines, sec.
- detmn. of – involving azo-coupling reactions 179

Amino acids
- anal. of – and dipeptides by mass spectrometry, laser desorption, influence of wave length 66
- anal. of – in proteins by pyrolysis and MS 5
- detmn. of – by chromatography, liquid, photothermal refraction as detector 172
- detmn. of – in brain by HPLC with electrochem. detection 95
- detmn. of – in feeds by HPLC 191
- detmn. of – in saccharomyces strains, yeast strains by GC 95
- nickel oxide amperometric detector in chromatographic sepn. of – 181
- sepn. of – as thiohydantoins by HPLC 95
- sepn. of – by reversed-phase LC with aqueous mobile phases containing Cu^{2+} and alkylsulfonates 196

p-Aminobenzoic acid
- detmn. of – for peptide-PABA-test 294

Aminodarone
- detmn. of – and its N-deethyl metabolite in blood plasma, urine and bile 194

Ammonia
- detmn. of – in Kjeldahl digest 175

Amperometric titration
- chelating reagents, sulfur-containing in – of mercury(II) and copper(II) 174

Amphetamine
- detmn. of amines, enantiomeric in – by reversed-phase HPLC, derivatization 93

Ampicillin
- detmn. of –, ranitidine, thioethers in blood plasma by HPLC with on-line generated bromine 103

α-Amylase
- detmn. of – in biological fluids, new substrate β-2-chloro-4-nitrophenyl-maltopentaoside 99
- detmn. of –, quality control material 305
- detmn. of – with ethylidene protected substrate 304

Anabolics
- trace anal. of – by HPLC on diol phase 97

Analgesics
- detmn. of – in blood and urine by TLC on resin Y_{29} 101

Analytical chemistry
- handbook of chemical equilibria in – 62
- spectroscopy, photothermal in surface analysis and – 456

Anions
- detmn. of – in air by HPLC, after adsorption in Liesegang filters 79
- pentafluorobenzyl p-toluenesulfonate for detmn. of – by GC 174
- sepn. of – by ion-pair chromatography and UV detection 78
- sepn. of radiolabelled – by chromatography, HPLC 171

Anions, inorganic
- chromatography, liquid of – on an alumina column 171
- detmn. of – and anions, organic in water by ion chromatography/UV detection 82

Anions, organic
- detmn. of anions, inorganic and – in water by ion chromatography/UV detection 82

Anthracenes
- detmn. of – by fluorimetry, phase-resolved at two modulation frequencies 65

Antibiotics
– monitoring of – in body fluids by HPLC, immunoassay, review 195
– Ullmann's encyclopedia of industrial chemistry, Vol. 2 A, amines to – 168
Antibodies
– charact. of immunecomplexes of monoclonal – 253
– detmn. of apolipoprotein B by ELISA with monoclonal – 247
– ELISA with monoclonal – 246
– ident. of – by immunoblot and immuno-precipitation 251
– new target for islet cell surface – 252
– specificity of – to collagen types 248
Antibody specificity
– , somatic mutation 202
Antidepressants
– detmn. of tranquilizers and – using 2,3-dichloro-5,6-dicyano-p-benzoquinone by spectrophotometry 90
Antigen
– recognition 201
Antihistamines
– detmn. of – with tetracyanoquinodimethane by spectrophotometry 90
Antilipid A antibodies
– study of – 367
Antimony
– detmn. of – in air, particulates by AAS/hydride generation 79
– detmn. of – in sea water by AAS with conc. of stibine in a graphite furnace 188
– detmn. of – with PAN by substoichiometric radiochem. method 176
Apolipoprotein B
– detmn. of – by ELISA with monoclonal antibodies 247
Arabinitol
– detmn. of D– in blood serum by enzymatic fluorimetry 198
4(5)-D-arabinotetrahydroxybutylimidazoline-2-thione
– detmn. of palladium in catalysts with – by spectrophotometry 77
Archeological materials
– detmn. of elements, compounds and mineral phases in – by analytical spectroscopic methods 875
Archeology
– application of spectroscopy in –, lists of methods, materials and investigated areas of interest 875
Arenediazonium salts
– detmn. of – involving azo-coupling reactions 180
Aromatic compounds, polychlorinated
– detmn. of methylthio-substituted – by GC/MS 83
Aromatic compounds, polycyclic
– sepn. of – by adsorption chromatography, standardisation of alumina and silica 83
Arsenic
– detmn. of – and selenium in butter and polythenes by oxygen bomb combustion 86
– detmn. of – in biological materials by AAS, comparison of mineralisation methods 94
– detmn. of – in steel and cast iron by hydride AAS 183
– detmn. of –, scandium, chromium, cobalt and nickel in asbestos by NAA 185
– Zeeman AAS of – with platinum as a matrix modifier 176
Arsenic(III)
– detmn. of – and arsenic(V) in ferric sulfate-sulfuric acid leaching media by ion-chromatography 185
– extr. of – from chloride-iodide solutions 176
Arsenic(V)
– detmn. of arsenic(III) and – in ferric sulfate-sulfuric acid leaching media by ion-chromatography 185
Arsenicorgano compounds
– detmn. of – by voltammetry 179
Arylaliphatic acids
– sepn. of – by GC, retention and structure 181
N-arylhydroxamic acids
– detmn. of tandalum(V) with – by extr. -spectrophotometry 77
Asbestos
– detmn. of arsenic, scandium, chromium, cobalt and nickel in – by NAA 185
Ascorbic acid
– detmn. of – in milk and whey by HPLC 88
– detmn. of total – in blood serum by HPLC/fluorimetry 199
– detmn. of – using bacterial, tissue and enzyme electrode 91
– sepn. of –, dehydroascorbic acid, diketogulonic acid and glucose in fruit juices by HPLC 88
Atmosphere, upper
– spectrometry, IR for measurement of trace gases in air, air pollution and – using ballon-borne spectrometer and long path cells 579
Atomization mechanisms
– in spectrometry, atomic absorption, hydride-generation 832
Atomizer, electrothermal
– , molecular formation, interferences and possibilities 497
ATPase
– detmn. of – activity in grapevine roots 85
Atrazine
– detmn. of –, lindane, pentachlorophenol and diazinon in water and soils by isotope dilution GC/MS 85
Atropine
– detmn. of – in pharmaceutical products by LC with fluorescence detection 92
Autoantibodies
– in blood serum 292
Autocorrelation function
– spectrometry, atomic, improving signal/noise ratio by cross correlation techniques, –, anal. strategy 507
Automation
– potential of flow-injection analysis for spectrometry, atomic absorption and spectrometry, ICP, sample injection, – 745
Aza-12-crown-4
– chromogenic – as a selective reagent for lithium ion 74
Azide
– detmn. of carbohydrates, effect of – on the common methods 198
Azino-di(3-ethylbenzthiazoline-6-sulfonate)
– detmn. of monoamine oxidase with – 307

B

Background correction
– spectrometry, atomic emission, –, concept of selectivity, practical resolving power, instrumentation for high spectral resolution 397
Ballast materials
– detmn. of – in foods, comparison of methods 88
Barbituric acid
– effect of – in detmn. of cyanide and thiocyanate by pyridine-barbituric acid method 78
Barium
– sepn. of uranium(VI), aluminum, strontium, – and mercury(II) by cation exchange chromatography in aqueous ammonium acetate 66
– titration of sulfate with – using Ba-selective electrode 79
Beer
– detmn. of sulfur dioxide in hop and – by gas-adsorption chromatography 86
Bencyclane
– detmn. of – in biological materials by GC 101
Benzene derivatives, disubstituted
– resolution of o-, m-, and p-isomers of – using reversed-phase HPLC 181
Benzo(a)pyrene
– detmn. of – in total particulate matter of cigarette smoke by LC 89
Benzoquinoline
– detmn. of – isomers in complex samples 181
Benzyltributylammonium chloride
– sepn. of steroid sulfates from blood plasma by extraction with – 289
Betiromide
– assay of – in blood plasma by colorimetry 196
Bile
– detmn. of aminodarone and its N-deethyl metabolite in blood plasma, urine and – 194
Binding parameters, thermodynamic
– evaluated by phase-resolved fluorimetry 174
Biochemical analysis
– NMR imaging, spectrometry, NMR in vivo, –, medical diagnosis 767
– spectrometry, PIXE, state of the art, applications in geological analysis, –, clinical analysis and environmental analysis 635
Bioelements
– natural abundances of stable isotopes of the main – in biological materials 760
Biological fluids
– anal. of methylphenidate and p-hydroxymethyl-phenidate in – by GC/MS 103
– anal. of mitozolomide in – by HPLC 195
– assay of pibenzimol in – by HPLC 195
– detmn. of 3-deazaguanine in – by HPLC 195
– detmn. of α-amylase in –, new substrate β-2-chloro-4-nitrophenyl-maltopentaoside 99
– detmn. of clavulanic acid in – by spectrophotometry 196
– detmn. of clobazam and metabolites in – by HPLC 103
– detmn. of lysinoalanine, furosine and pyridosine in foods and – by GLC 87
– detmn. of ofloxacin in – by HPLC 354
– detmn. of phosphatase, alkaline in – by immunoprecipitation 101
– detmn. of physostigmine in – by LC using dual-electrode electrochem. detection 196
– sepn. of tropatepine in – by HPLC 102
Biological materials
– anal. of pesticides in – 231
– assay of phosphatase, alkaline in – with coumarin-derived substrates 101
– detmn. of 4-hydroxynonenal in – and foods by HPLC 87
– detmn. of arsenic in – by AAS, comparison of mineralisation methods 94
– detmn. of bencyclane in – by GC 101
– detmn. of carbaryl in – by HPLC 104
– detmn. of dibenzodioxins and dibenzofurans in – by GC/MS, interlab study 193
– detmn. of glucose in –, reference methods 207
– detmn. of nickel and cobalt in natural water and – by chronopotentiometric stripping anal. 188
– detmn. of selenium in foods and – by fluorimetry, a validation study 86
– detmn. of tryptophan in – by HPLC 95
– detmn. of vitamin E in – by HPLC, review 1
– elemental analysis of – by spectrometry, atomic, flame, furnace and plasma based methods, sample preparation 463
– environmental toxins in –, detmn. 232
– natural abundances of stable isotopes of the main bioelements in – 760
– reference ranges for carnitine in – 291
– sepn. of metals in – by radiochemical NAA 13
– speciation of bound and free metals in – 94

Biological materials
– spectrometry, IR of –, proteins, lipids, carbohydrates, nucleic acids, relevant studies 655
– thin section energy dispersive X-ray microanal. of – 193
Biological reference materials
– standard reference materials, –, glass reference materials, application, development, homogeneity, directory 376
Biological tissues
– HPLC of 4-bromomethyl-7-methoxycoumarin ester derivative of 5-pyrrolidone-2-carboxylic acid in – with fluorimetric detection 199
Biotin
– sepn. of – and analogues by HPLC 91
Biphenyls, polychlorinated
– detmn. of – by autor.ated GC/MS 193
– detmn. of – by GC, comparison of packed and capillary columns 83
– detmn. of – by GC with ECD, surrogate standards 193
– detmn. of – by MS 193
4,4′-Bipyridyl salts, quaternary
– sepn. of – by reversed-phase TLC 182
Bis(2-chloroethyl)-sulfide
– detection of mustard gas, – in urine by GC 104
Bismuth
– detmn. of thallium in – by DPASV 182
– detmn. of – with 2-(5-bromo-2-pyridylazo) -5-diethylaminophenol by spectrophotometry 176
β-Blockers
– detmn. of – in urine by TLC 101
– sepn. of enantiomers of – by HPLC 324
Blood
– anal. of – with Seralyzer system 243
– detmn. of analgesics in – and urine by TLC on resin Y_{29} 101
– detmn. of ciclosporin in – by HPLC, column switching 328
– detmn. of morphine, codeine and dihydrocodeine in – by HPLC with electrochem. detection 104
– detmn. of neonatal thyrotropin in – by fluoro-immunoassay 267
– detmn. of neonatal thyrotropin in – by immunometric assays 268
– detmn. of primaquine in whole – and urine by HPLC 103
– detmn. of thiamine and its phosphate esters in – by HPLC 98
– heterogeneous samples in flow injection analysis, – 93
Blood plasma
– anal. of yohimbine in – by HPLC 196
– assay of betiromide in – by colorimetry 196
– assay of cisplatinum in – by HPLC 195
– assay of ibuprofen in – by HPLC 194
– assay of methylprednisolone in – by HPLC 97
– assay of nomifensine metabolites in – by HPLC with UV detection 194
– assay of phyllanthoside and its stability in – by HPLC 195
– detection of mitoxantrone in – and urine by HPLC 195
– detmn. of aminodarone and its N-deethyl metabolite in –, urine and bile 194
– detmn. of ampicillin, ranitidine, thioethers in – by HPLC with on-line generated bromine 103
– detmn. of buprenorphine in – by HPLC 104
– detmn. of ciclopirox in – by HPLC after pre-column derivatization 196
– detmn. of cytarabin in – by HPLC 329
– detmn. of diclofensine in – by HPLC/ fluorimetry 194
– detmn. of doxazosin in – by HPLC with fluorimetric detection 102
– detmn. of furasemide in – and urine by HPLC 101
Blood plasma
– detmn. of glycopyrronium in – by capillary GC 196
– detmn. of heparin in –, problems in sample preparation 96
– detmn. of megestrol acetate in – by HPLC 103
– detmn. of metaldehyde in – and urine by GC 94
– detmn. of organic acids in –, "anion gap", by HPLC 330
– detmn. of oxamniquine in – by HPLC 103
– detmn. of prostaglandins in – by HPLC, column switching 97
– detmn. of retinoic acids in – by GC/MS 98
– detmn. of theophylline, caffeine and phenobarbital in – by HPLC 102
– detmn. of theophylline in – by HPLC 102
– detmn. of total proteins in – with tyrosinase enzyme electrode 197
– detmn. of tranilast in – by HPLC 195
– detmn. of xylosyltransferase in synovial fluid and – 311
– extr. of vitamin D_3 metabolites from – for HPLC and GC/MS 104
– free and conjugated catecholamines in – 287
– HPLC of glucose, fructose, sorbitol and sorbinil in human lens and – 198
– ident. of proteins in – by two-dimensional electrophoresis, mapping 197
– ident. of renin inhibitors in – by gel chromatography 101
– isol. of insulin-like growth factors from – 293
– sepn. of steroid sulfates from – by extraction with benzyltributylammonium chloride 289
– solid phase extr. system for vitamin D and its major metabolites in – 199
– study of catecholamines in – after TRH test 285
Blood serum
– assay of NADPH-dependent isocitrate dehydrogenase in – by bioluminescence 100
– autoantibodies in – 292
– detmn. of 3-hydroxybutyrate in – by automated enzymatic anal. 95
– detmn. of 4′-deoxydoxorubicin, 4′-deoxy-rubicinol in – by HPLC 195
– detmn. of acetol in – by HPLC 194
– detmn. of albumin, glycosylated in – by fluorimetry 96
– detmn. of carboxylic acids in – by GC via benzyl ester derivatives 331
– detmn. of creatine kinase isoenzyme in – 260
– detmn. of creatinine and uric acid in human – by ID-HPLC 279
– detmn. of creatinine in – by enzymatic method 309
– detmn. of creatinine in – by HPLC, column switching 334
– detmn. of D-arabinitol in – by enzymatic fluorimetry 198
– detmn. of dehydroepiandrosterone sulfate in – by RIA 259
– detmn. of electrolytes in –, reference methods 205
– detmn. of glycerol in – and urine by GC-MS 312
– detmn. of glycerol in – by isotope dilution-MS 280
– detmn. of leucine aminopeptidase in – with L-leucinamide as substrate 100
– detmn. of lipoprotein X in – by enzymatic anal. 96
– detmn. of magnesium in – and urine with xylidyl blue-1 by Cobas Mira Analyzer 297
– detmn. of myo-inositol in – by enzymatic assay 304
– detmn. of paracetamol in – 353
– detmn. of phospholipase A in – 308
– detmn. of pseudouridine and uric acid in urine and – by HPLC 99
Blood serum
– detmn. of suramin in – by isocratic HPLC sepn. 356
– detmn. of terodiline in – by flow-injection extr. and GC 101
– detmn. of theophylline in –, photom. 352
– detmn. of thyroxine in – by HPLC 318
– detmn. of total ascorbic acid in – by HPLC/ fluorimetry 199
– detmn. of urea in – by pH-indicator method 94
– detmn. of uric acid in – by HPLC, column switching 333
– detmn. (simult.) of pyridoxal and pyridoxal 5-phosphate in – by flow injection anal. 199
– electrochem. flow-through detmn. of uric acid in – 95
– monitoring of drugs in – by HPLC 350
Body fluids
– detmn. of ofloxacin in – by HPLC 355
– monitoring of antibiotics in – by HPLC, immunoassay, review 195
Borohydride
– detmn. of trace elements in water, preconc. by reductive precipitation with – 81
Boron
– detmn. of – in geological materials with a tetrafluoroborate-selective electrode 186
Bovine serum
– charact. of a – reference material for major, minor and trace elements 193
– detmn. of cholesterol and triglycerides, – 290
Brain
– changes of dopamine release and phospho-inositides turnover in – 346
– detmn. of amino acids in – by HPLC with electrochem. detection 95
– radioreceptor assay of opioid peptides, peptides in canine – regions 96
Brain tissue
– detmn. of neurotransmitters in rat – by HPLC 321
Bromhexine
– detmn. of – by AAS, indirect 89
Bromomethyldimethoxymethylquinoxalinone
– detmn. of carboxylic acids as – derivatives by HPLC 180
2-(5-Bromo-2-pyridylazo)-5-diethylaminophenol
– detmn. of bismuth with – by spectrophotometry 176
Buprenorphine
– detmn. of – in blood plasma by HPLC 104
Butter
– detmn. of arsenic and selenium in – and polythenes by oxygen bomb combustion 86

C

Cadmium
– detmn. of – and lead in milk by platform furnace Zeeman AAS 86
– detmn. of – and zinc traces in waste water by spectrophotometry 187
– detmn. of – by suction-flow liquid-liquid extraction ICP-AES 75
– detmn. of zinc in waste water in presence of – by kinetic method 82
Caffeine
– detmn. of theophylline, – and phenobarbital in blood plasma by HPLC 102
Calcium
– detmn. of – in cast iron by X-ray fluorescence spectrometry 183
– detmn. of – in potable water with 2-(2-(8-hydroxyquinolyl)azo)-1-naphthol by spectrophotometry 187
– detmn. of – in water with hydroxynaphthol blue by flow injection anal. 187
– detmn. of potassium, sodium, – and magnesium in dialysis fluid by capillary isotachophoresis 94

Calcium
– detmn. of –, zinc, manganese, iron, magnesium and phosphorus in feeds by ICP-AES 85
– phosphine depression of – atomic emission signals in flame spectrometry 75
– phospholipase C as function of ionised – in hepatocytes 344
– study of – movements in cells 237
– titration of – and magnesium in water with EDTA, problems by high alkalinity 82
Calcium-binding activity
– detmn. of – of proteins using a nitrocellulose membrane 197
Calibration equations
– simple procedures for constrained – 175
Calibration gas
– prep. of – mixtures in hydrogen sulfide 81
Calibration methods
– susceptibility of – to errors in the analytical signal 175
Calorimetry, thermal lens
– , time-resolved measurements in flowing samples 173
Calpain
– detmn. of – by hydrophobic chromatography 100
Carbaryl
– detmn. of – in biological materials by HPLC 104
Carbohydrates
– detmn. of –, effect of azide on the common methods 198
– detmn. of –, organic acids and sugar alcohols in seminal plasma by HPLC 198
– spectrometry, IR of biological materials, proteins, lipids, –, nucleic acids, relevant studies 655
Carbon
– detmn. of nitrogen and – in silicon by photon activation 184
– detmn. of trace – in silicon layers by secondary ion mass spectrometry, on-line ion implantation 184
Carbon, activated
– anal. of granular – by XRF, standards 184
Carbonate alkalinity
– detmn. of – 173
Carbon fiber electrode
– electroanalytical applications of – 172
Carbon paste electrodes
– study of hexachloroiridate(IV) by voltammetry at – 47
Carbonyl sulfide
– detmn. of – in air by capillary GC, derivatization with 1,3-diaminopropane 79
Carboxylic acids
– detmn. of – as bromomethyldimethoxymethylquinoxalinone derivatives by HPLC 180
– detmn. of – in blood serum by GC via benzyl ester derivatives 331
Carminic acid
– detmn. of vanadium with – and cetyltrimethylammonium chloride in metallurgical materials 183
Carnitine
– reference ranges for – in biological materials 291
Carotenoids
– decapreno-β-carotene as internal standard for quant. of hydrocarbon – in carrots by HPLC 87
Carrots
– decapreno-β-carotene as internal standard for quant. of hydrocarbon carotenoids in – by HPLC 87
Cascade impaction technique
– aerosols in spectrometry, flame atomic, –, spray chamber, aerosol ionic redistribution interference 846
Cast iron
– detmn. of arsenic in steel and – by hydride AAS 183
– detmn. of calcium in – by X-ray fluorescence spectrometry 183
Catalysts
– detmn. of molybdenum trioxide and tungsten trioxide in – by Raman spectrometry 183
– detmn. of nitrogen in sewage sludges, sewage effluents, new – for Kjeldahl method 189
– detmn. of palladium in – with 4(5)-D-arabinotetrahydroxybutylimidazoline-2-thione by spectrophotometry 77
– structure of –, detmn. by extended X-ray absorption 786
– surface analysis of polymers and – by mass spectrometry, laser, secondary ion mass spectrometry, LAMMA and spectroscopy, ESCA 589
Catecholamines
– detmn. of – in urine by ion-exchange chromatography, glycylglycine derivatization 196
– detmn. of – with an automatic analyzer 320
– free and conjugated – in blood plasma 287
– study of – in blood plasma after TRH test 285
Cellooligosaccharides
– detmn. of cellolytic enzymes by sepn. of – by TLC 96
Cells
– detmn. of UDP-glucose in – and tissues by isocratic HPLC 337
– inhibition of polyphosphoinositide breakdown and prostaglandin synthesis in rat – by proteins, islet-activating 342
– NMR studies of enzymes, macromolecules, –, tissues, listing of information 437
Cell surface receptor
– for proteoheparan sulfate 347
Cesium iodide
– desorption ionization of – by FT mass spectrometry 183
Chelating reagents, sulfur-containing
– in amperometric titration of mercury(II) and copper(II) 174
Chemical Abstracts Service
– online, book 63
Chemical equilibria
– handbook of – in analytical chemistry 62
Chloride
– detmn. of – and fluoride in boronated water using ion-selective electrodes 187
Chlorine
– detmn. of – with N,N-diethyl-p-phenylenediamine, interference by monochloramine 177
Chlorine dioxide
– detmn. of – in water by gas diffusion flow injection anal. 82
Chlorophthalimide, N-
– as new oxidant for titrations 174
Chloroquine
– detmn. of – by fluorimetry in a flowing stream 91
Chlorphoxim
– detmn. of – by LC, comparison of two methods 192
Cholesterol
– detmn. of – and triglycerides, bovine control serum 290
– detmn. of – autoxidation products in foods by LC or GC/MS 88
Chromate coatings
– anal. of – on aluminum by radiotracer technique and ion-exchange 183
Chromatograms, thin-layer
– quantitation of – with an Apple II computer-based videodensitometer 73
Chromatographic analysis, inorganic
– , book 168
Chromatography, adsorption
– , book 61
Chromatography, frontal
– detmn. of adsorption isotherms by – 69
Chromatography, gas
– anal. of flavors by –, multidimensional HRGC/FTIR/MS system 87
– anal. of gases by –, sampling and injection apparatus 80
– chromatography, liquid/–, on-line system 69
– "closed on-column"-system in – capillary 315
– , "cooled needle" sampling technique for capillary columns 70
– , deactivation of fused silica capillaries with phenylhydroxylsiloxanes 71
– detmn. of flavors by –, trapping and reinjection technique for capillary columns 71
– detmn. of thermodynamic characteristics from retention data in – 72
– , effect of carrier gas flow rate changes in capillary tandem system 72
– , efficiency of capillary columns with thick films 71
– , influence of tube diameter and film thickness in capillaries 70
– , large-volume injector for capillary columns 70
– liquid crystal stationary, phases for – and chromatography, supercritical fluid 71
– , monitoring of static coating of capillaries 70
– negative chemical ionization and accurate mass measurements for a linked system –/spectrometry, FT-IR/mass spectrometry, FT 839
– , new liquid crystalline stationary phase 71
– , optimization for sequentially coupled capillary columns 71
– , optimization of FID for capillary GC 72
– , peak profiles with overloaded capillary columns 72
– , polyethylene glycol immobilization in capillaries 70
– predicting retention data in – by multivariate analysis 73
– , prep. of capillary columns, review 70
– , prep. of new methoxyphenyl phase for capillary columns 70
– , sampling techniques for capillary columns 70
– sepn. of enantiomers by capillary –, crosslinking of polymeric chiral phases 72
– sepn. of hydrocarbons by –, on capillary columns packed with $BaSO_4$ 72
– , split injection for samples with wide boiling point range 71
– , split interface for multiple detection 71
– , surface roughening in glass capillaries with NaCl deposition 70
– , temperature programmed retention indices 73
– , thermal modulations of capillary column 71
– , thermodynamic characteristics and isothermal retention indices 73
– , thickness of liquid crystalline stationary phase film in capillary columns 71
– , with FTIR detection and capillary column switching 72
Chromatography, HPLC
– , ageing processes of alkylbonded phases 67
– chemical sensors, optical fibre combined with spectrophotometry, ion-exchange, – and flow-injection analysis 372
– computerized dynamic voltammetric detection in –, etoposide and teniposide 68
– detmn. of creatinine by –, as reference methods 209
– electrolytic efficiency of amperometric detection in – 171
– , new system with trifunctional detector 68
– nonionic polyoxyethylene(23)dodecanol micellar mobile phases in reversed-phase – 67
– on pentafluorobenzamidopropyl silica gel 67

Chromatography, HPLC
– sepn. of nucleic bases, nucleosides and nucleoside phosphates by – 316
– sepn. of radiolabelled anions by – 171
– solvent gradient elution in micro – 68
– /spectrometry, FTIR, interface with KCl substrate 171
– /spectrometry, FTIR with attenuated total reflectance flow cell 171
– study of retention processes in reversed-phase – 67
– sub-microlitre permitivity detectors for – 68
– , thermodynamic retention models 67
– , trifunctional detector 170
Chromatography, hydrodynamic
– detector, light-scattering for capillary – 69
Chromatography, ion
– detection of cobalt and manganese in –, electrocatalytic effect 66
Chromatography, ion-exchange
– anal. of silicates by –, new scheme 43
– sepn. of gold and platinum metals by – 171
– detmn. of tensides, alkylsulfates and alkylsulfosuccinates by reversed-phase 154
Chromatography, ion-pair
– , theory and biological and pharmaceutical applications, book 169
Chromatography, liquid
– , annular space between rotating cylinders as column 67
– /chromatography, gas, on-line system 69
– , detector, absorbance with retroreflective array 170
– detmn. of amino acids by –, photothermal refraction as detector 172
– direct liquid introduction interface for capillary –/mass spectrometry 170
– direct sample introduction system for spectrometry, ICP, detection in microcolumn – 171
– gas-phase monitoring by – with gas-phase preconcentrator interface 80
– , indirect detection of nonelectrolytes by solubility enhancement 68
– , interpretation of the model chromatographic data 67
– laser-based circular dichroism detector for – 171
– laser-based simult. absorbance, fluorescence and refractive detector for – 171
– /mass spectrometry, gas-phase ionization in thermospray interface 170
– micro –/mass spectrometry, direct liquid introduction 170
– , open tubes and post column derivatization 68
– , small diameter columns with dual amperometric detection 68
– , surface heterogeneity effects 67
– , thermospray LC/MS interface 170
Chromatography, multi
– , definition and possibilities 68
– , GC with multiple stationary phases in series 68
Chromatography, paper
– sepn. of cobalt complexes and platinum complexes by – with phenol containg solvents 178
Chromatography, supercritical fluid
– , capillary columns and various mobile phases 69
– capillary – with simult. flame ionization and MS detection 69
– , effect of modifiers in CO_2 mobile phase 69
– liquid crystal stationary, phases for chromatography, gas and – 71
– , pressure programming 69
– , retention behavior with capillary columns 69
Chromatography, thin-layer
– liquefied gases as eluents for – 73
– of metal chelates, dialkylthiobenzoyl-thiourea 127
Chromatography, thin-layer
– on chromarods, improved sample application for the Iatroscan 73
– on coated quartz rods, FTID for nitrogen and halogen compounds 73
– sepn. of oligopeptides by –, new reversed-phase plates 73
Chromium
– detmn. of arsenic, scandium, –, cobalt and nickel in asbestos by NAA 185
– sepn. of copper, cobalt, nickel, – and vanadium chelates with 5-Br-PAPS by HPLC 178
– speciation of – in sea water 188
Chromium(II)
– strongly reducing agents in flow-injection analysis, – and vanadium(II) 174
Chromium(VI)
– detmn. of – by catalysed oxidation of hydroiodic acid 77
Chromosomes, Y
– anal. of aberrant human – 271
Ciclopirox
– detmn. of – in blood plasma by HPLC after pre-column derivatization 196
Ciclosporin
– detmn. of – in blood by HPLC, column switching 328
Cigarette smoke
– detmn. of benzo(a)pyrene in total particulate matter of – by LC 89
Cimetidine
– detmn. of – in pharmaceutical products by polarography 90
Circular dichroism
– laser-based – detector for chromatography, liquid 171
Cisplatinum
– assay of – in blood plasma by HPLC 195
Citrus leaves
– detmn. of nickel, lead, zinc and copper in – and rice flour by LC 86
Clavulanic acid
– detmn. of – in biological fluids by spectrophotometry 196
Clinical analysis
– by multilayer-film technique 242
– , comparison of systems Ektachem, Reflotron and Seralyzer 240
– , equation for mean values of multiple specimens 94
– for inflammation markers 229
– reference methods for – 204
– spectrometry, PIXE, state of the art, applications in geological analysis, biochemical analysis, – and environmental analysis 635
– standard reference materials in –, environmental analysis and nutritional, agricultural and industrial analytical chemistry 376
– , toxicology, promotion by DFG 235
– with reagents, carrier-bound quality control 245
Clobazam
– detmn. of – and metabolites in biological fluids by HPLC 103
Cobalt
– detection of – and manganese in chromatography, ion, electrocatalytic effect 66
– detmn. of arsenic, scandium, chromium, – and nickel in asbestos by NAA 185
– detmn. of – in water by AAS, preconc. on nitroso-R salt resin 188
– detmn. of nickel and – in natural water and biological materials by chronopotentiometric stripping anal. 188
– detmn. of –, nickel and iron by simult. spectrophotometry 178
– detmn. of radioactive – in water, solvent extr. and back-extr. with Bi(III) 184
– detmn. of – traces by photometry 178
– selective spectrophotometric titration of – via its nitro complex 77
Cobalt
– sepn. of –, copper and nickel as diethyldithiocarbamates by HPTLC 178
– sepn. of copper, –, nickel, chromium and vanadium chelates with 5-Br-PAPS by HPLC 178
Cobalt alloys
– anal. of – by spectrometry, X-ray fluorescence, matrix effect correction 183
Cobalt complexes
– sepn. of – and platinum complexes by chromatography, paper with phenol containg solvents 178
Codeine
– 2,3-dichloro-5,6-dicyano-p-benzoquinone in assay of –, emetine and pilocarpine 92
– detmn. of morphine, – and dihydrocodeine in blood by HPLC with electrochem. detection 104
Codeine phosphate
– detmn. of acetaminophen, salicylamide and – by pH-induced difference spectrophotometry 90
Colchicine
– detmn. of – in pharmaceutical products by LC 92
Collagen
– specificity of antibodies to – types 248
Complex ions
– anal. of foreign – in silver halide crystals 120
Complexometry
– new data on masking reagents in –, review 173
Computer control
– anal. of metals by OAS, holographic grating, interferometer, Michelson, image detectors, data acquisation and processing, – 793
– of 2-dimensional NMR, ^{13}C-NMR 771
Computer industry
– surface analysis of materials technology within a –, overview 426
Computer program
– for optimization of radiochemical analysis techniques 649
Coomassie blue
– detection of proteins in electrophoresis, staining with – dyes 197
– detmn. of proteins, immobilized on various matrices with – 197
Copper
– detmn. of – in milk powder by AAS and AES 86
– detmn. of lead and – after preconc. on iminodiacetic acid-cellulose filters 76
– detmn. of nickel, lead, zinc and – in citrus leaves and rice flour by LC 86
– sepn. of cobalt, – and nickel as diethyldithiocarbamates by HPTLC 178
– sepn. of –, cobalt, nickel, chromium and vanadium chelates with 5-Br-PAPS by HPLC 178
Copper(I)
– detmn. of – in plant materials with salicylaldehyde thiosemicarbazone by spectrophotometry 190
Copper(II)
– chelating reagents, sulfur-containing in amperometric titration of mercury(II) and – 174
– detmn. of – ultratraces in water by catalytic anal. 82
– simple and mixed ligand complexes of – with polyfunctional phenolic compounds as models of natural substances 190
Copperorgano compounds
– Gmelin handbook, – 62
Corrosion
– anal. of – and oxidation, surface analysis of steel, Cr-Ni alloys and metals by spectrometric methods, depth profiles 625
Cortisol
– detmn. of – in saliva by RIA 260
Cotinine
– detmn. of nicotine and – in urine by GC 104
– detmn. of nicotine and – in urine by HPLC 104
Creatine kinase isoenzyme
– detmn. of – in blood serum 260
Creatine kinase isoenzyme BB
– detmn. of – by enzyme immunoassay 100

Creatinine
– detmn. of – and uric acid in human blood serum by ID-HPLC 279
– detmn. of – by chromatography, HPLC, as reference methods 209
– detmn. of – by HPLC 278
– detmn. of – in blood serum by enzymatic method 309
– detmn. of – in blood serum by HPLC, column switching 334
Cross correlation techniques
– spectrometry, atomic, improving signal/noise ratio by –, autocorrelation function, anal. strategy 507
Cyanide
– detmn. of – and dicyanoargentate with $AgNO_3$ by potentiometry titration 78
– effect of barbituric acid in detmn. of – and thiocyanate by pyridine-barbituric acid method 78
Cyanide complexes
– detmn. of metals as – by potentiometric titration 179
Cyclitols
– estimat. of plant – and polyols by GC 338
Cyclosporin
– peak broadening in HPLC of – 172
Cytarabin
– detmn. of – in blood plasma by HPLC 329

D

Data banks
– in spectrometry, search strategies, AES, NMR, proton-NMR, IR spectra 714
DC arc
– spectrometry, optical emission, – as radiation source, fundamental properties, improvement and development, matrix effects 698
– , wall stabilized for optical emission spectroscopy 519
3-Deazaguanine
– detmn. of – in biological fluids by HPLC 195
Decapreno-β-carotene
– as internal standard for quant. of hydrocarbon carotenoids in carrots by HPLC 87
Decay curves, multi-exponential
– automatic computerized anal. of – 74
Dehydroascorbic acid
– sepn. of ascorbic acid, –, diketogulonic acid and glucose in fruit juices by HPLC 88
Dehydroepiandrosterone sulfate
– detmn. of – in blood serum by RIA 259
Dehydrogenases
– enzyme electrodes with – 274
Densitometer
– computer-aided – for gel electrophoretograms 73
4′-Deoxydoxorubicin
– detmn. of –, 4′-deoxyrubicinol in blood serum by HPLC 195
Deoxyribonucleosides
– sepn. of purines, pyrimidines, ribonucleosides and – by reversed-phase HPLC, stationary phases 98
4′-Deoxyrubicinol
– detmn. of 4′-deoxydoxorubicin, – in blood serum by HPLC 195
Depth profile analysis
– of tungsten carbide coatings by spectrometry, Auger electron/sputtering 111
Depth profiles
– anal. of corrosion and oxidation, surface analysis of steel, Cr-Ni alloys and metals by spectrometric methods, – 625
Detector, absorbance
– chromatography, liquid, – with retroreflective array 170
Detector, chemiluminescence
– for hydrogen peroxide in rain water 82
Detector, light-scattering
– for capillary chromatography, hydrodynamic 69
Dextromethorphan
– assay of mixtures of phenylpropylamine hydrochloride with guaifenesin or – in solid cough formulations 90
Dialkylthiobenzoyl-thiourea
– chromatography, thin-layer of metal chelates, – 127
Dialysis fluid
– detmn. of potassium, sodium, calcium and magnesium in – by capillary isotachophoresis 94
Dialyzer membranes
– effect of different – on the release of granulocyte elastase 369
Diazinon
– anal. of – by GC, impurities and degradation products 192
– detmn. of atrazine, lindane, pentachlorophenol and – in water and soils by isotope dilution GC/MS 85
Dibenz(a,h)anthracene
– detmn. of metabolites of the carcinogenic PAH – 357
Dibenzodioxins
– detmn. of – and dibenzofurans in biological materials by GC/MS, interlab study 193
Dibenzodioxins, polychlorinated
– detmn. of – and dibenzofurans, polychlorinated in oils by GC/MS 23
Dibenzofurans
– detmn. of dibenzodioxins and – in biological materials by GC/MS, interlab study 193
Dibenzofurans, polychlorinated
– detmn. of dibenzodioxins, polychlorinated and – in oils by GC/MS 23
2,3-Dichloro-5,6-dicyano-p-benzoquinone
– detmn. of tranquilizers and antidepressants using – by spectrophotometry 90
– in assay of codeine, emetine and pilocarpine 92
Diclofensine
– detmn. of – in blood plasma by HPLC/fluorimetry 194
Dicyanoargentate
– detmn. of cyanide and – with $AgNO_3$ by potentiometric titration 78
Diethylstilbestrol
– detection of – analogues, indene estrol by HPLC/thermospray MS 97
– screening of – in bovine urine by HPLC with UV detection 97
Dihydrocodeine
– detmn. of morphine, codeine and – in blood by HPLC with electrochem. detection 104
Diisocyanates
– detmn. of – and acid anhydrides, phthalic anhydride in air by HPLC 80
Diketogulonic acid
– sepn. of ascorbic acid, dehydroascorbic acid, – and glucose in fruit juices by HPLC 88
Dimethylnaphthalenes
– sepn. of – by capillary GC with liquid crystalline stationary phases 181
Dinoseb acetate
– anal. of –, stability 301
Dipeptid-enantiomers
– sepn. of – by TLC 339
Dipeptides
– anal. of amino acids and – by mass spectrometry, laser desorption, influence of wave length 66
Dithizone
– detmn. of palladium and platinum with – by extr. spectrophotometry 78
DNA
– genetic analysis of – 212
Dopa
– detmn. of m- and p-O-methylated products of L– by HPLC with electrochem. detection 95
Dopamine release
– changes of – and phosphoinositides turnover in brain 346
Doxazosin
– detmn. of – in blood plasma by HPLC with fluorimetric detection 102
Doxorubicin
– detmn. of – in urine by flow injection anal./voltammetry 103
Drugs
– anal. of crude – by pyrolysis GC 89
– anal. of pharmaca and – 233
– anal. of various – by HPLC 349
– detmn. of antiepileptic – in physiological fluids by HPLC, column switching 326
– monitoring of – in blood serum by HPLC 350
– sepn. of enantiomers of phenolic α/β-receptor active – by capillary GC after derivatization 325
Dyes
– detmn. of – in waste water and gasoline by thermospray HPLC/MS 189
Dysprosium
– detmn. of erbium, terbium and – with xylenol orange by amperometric titration 76

E

Eicosanoides
– pharmacology of – 227
Elastase
– contents and release of polymorphonuclear leukocytes 359
Electrodes
– poly(N,N-dimethylaniline) film with ion-exchange properties as – modifier 172
– spectroelectrochemistry at twin interdigitated – 172
Electrodes, ion-selective
– , anal. chem. symposia series, book 61
– anal. of soils using – 85
Electrolytes
– detmn. of – in blood serum, reference methods 205
Electron microprobe
– anal. of thin films by –, Bremsstrahlung background 65
Electrophoresis
– conc. of macromolecules by –, apparatus 193
– detection of proteins in –, silver staining in polyacrylamide gels 197
Electrophoresis, capillary zone
– , effect of physical parameters 172
Electrophoresis, gel
– screening of enzymes in –, product-selective blotting using an image gel 99
Electrophoretograms
– computer-aided densitometer for gel – 73
Elemental analysis
– by mass spectrometry 886
– by mass spectrometry, high accuracy 601
– of biological materials by spectrometry, atomic, flame, furnace and plasma based methods, sample preparation 463
– sampling and sample preparation of tree needles, plant materials for – 158
Elements
– charact. of a bovine serum reference material for major, minor and trace – 193
– detmn. of –, compounds and mineral phases in archeological materials by analytical spectroscopic methods 875
– detmn. of – in marine materials, certification of mussels tissue powder as reference materials 194
– extr. of – from plants into solution using supersound 190
Element speciation
– preconcentration in natural water, high-purity materials, – 672
ELISA
– detmn. of apolipoprotein B by – with monoclonal antibodies 247

ELISA
– with monoclonal antibodies 246
Emetine
– 2,3-dichloro-5,6-dicyano-p-benzoquinone in assay of codeine, – and pilocarpine 92
Enalapril
– detmn. of – in pharmaceutical products by flow-injection anal. 90
Enantiomers
– sepn. of – by capillary chromatography, gas, crosslinking of polymeric chiral phases 72
– sepn. of – of β-blockers by HPLC 324
– sepn. of – of alcohols and ketones by capillary GC with selective complexation 179
– sepn. of – of phenolic α/β-receptor active drugs by capillary GC after derivatization 325
Environmental analysis
– , airborne particulates, soils, sediments, rain, sea and river water, organic matter 662
– spectrometry, PIXE, state of the art, applications in geological analysis, biochemical analysis, clinical analysis and – 635
– standard reference materials in clinical analysis, – and nutritional, agricultural and industrial analytical chemistry 376
– the problem of accuracy in – 678
Environmental materials
– activation analysis, thermal neutron in multielement analysis, geological materials, –, high-purity materials 649
– anal. of – by spectrometry, atomic, graphite furnace AAS, ICP-AES, colorimetry 531
– detmn. of trace elements in geochemical materials and – by spectrometry, X-ray fluorescence, equation for matrix correction 27
Environmental reference materials
– , production, homogeneity, stability, analytical quality control 678
Environmental samples
– assay of iodine radionuclides in – by radiochem. anal. 190
– detmn. of alkylbenzenes in – by column chromatography 189
– detmn. of trace elements in –, accuracy, reference materials 678
– multielement analysis of – by spectrometry, X-ray fluorescence, total reflection, activation analysis, neutron and spectrometry, ICP-OES 662
Environmental toxins
– in biological materials, detmn. 232
Enzyme electrode
– detmn. of ascorbic acid using bacterial, tissue and – 91
– two-dimensional – sensor for glucose 198
– with dehydrogenases 274
Enzyme potentiometric sensors
– detmn. of glucose by – 198
Enzymes
– detmn. of cellolytic – by sepn. of cellooligosaccharides by TLC 96
– detmn. of proteins in immobilized – by derivative UV 281
– in matrix degradation 228
– NMR studies of –, macromolecules, cells, tissues, listing of information 437
– screening of – in electrophoresis, gel, product-selective blotting using an image gel 99
– studies of – by spectrometry, NMR, Fourier transform NMR, pulse techniques, 2-dimensional methods, high resolution studies 437
Eosin
– detmn. of equilibrium constants of – by derivative spectrophotometry 174
Equilibrium constants
– detmn. of – of eosin by derivative spectrophotometry 174
Equilibrium, thermodynamic
– , model for atomization in spectrometry, atomic absorption, graphite furnace, influence of O_2 in Ar purge gas 448
Erbium
– detmn. of –, terbium and dysprosium with xylenol orange by amperometric titration 76
Ergot alkaloids
– sepn. of – in illicit LSD by HPLC 92
Essential oils
– anal. of –, plant oils by capillary GC/MS, direct sampling 84
Esterase
– diacylglycerols and TPA as substrates for – 345
Estriol
– detmn. of – in saliva by RIA 289
Ethene
– detmn. of – from fruits by GC with FID 87
Ethyl parathion
– detmn. of – and methyl parathion in green vegetables and surface water by HPLC 192
Ethyl phosphite
– detmn. of –, phosphite and phosphate in plant tissues by HPLC/GC 84
Etoposide
– computerized dynamic voltammetric detection in chromatography, HPLC, – and teniposide 68

F

Faraday effect
– trace analysis by spectroscopy, coherent forward scattering, –, Voigt effect 612
Fats
– detmn. of organochlorine pesticides in swine and beef – by GC 192
– detmn. of triglycerides in – and oils by capillary GC, phenylmethylsilicone stationary phase 87
– quality control of – 215
Fatty acid methyl esters
– equivalent chain length for charact. of – separated by GC 180
Fatty acids
– assessment of non-esterified – and phosphoglycerides in myocardial tissues by silica gel column chromatography 199
– detmn. of – by GC, as butyl and pentyl esters 180
– sepn. of – (C_{14}–C_{30}) by gradient reversed-phase HPLC 180
Feeds
– detmn. of amino acids in – by HPLC 191
– detmn. of calcium, zinc, manganese, iron, magnesium and phosphorus in – by ICP-AES 85
– detmn. of furazolidone in – by LC 191
– detmn. of nifursol in – by HPLC 85
– detmn. of vitamin A in – by HPLC 85
– X-ray fluorescence analysis in agricultural chemistry, plants, –, fertilizers, soils, sludges, water and others 720
Felodipine
– assay of [^{14}C]– metabolites in urine by LC using bimodal column switching 102
Fenthion
– anal. of – by LC and GC, impurities 192
Fertilizers
– detmn. of lanthanides in phosphoric acid for – by HPLC with post-column reaction detection 185
– X-ray fluorescence analysis in agricultural chemistry, plants, feeds, –, soils, sludges, water and others 720
Fibronectin
– interaction to ligands 256
Fish
– detmn. of hydrocarbons, polycyclic aromatic in – by LC 83
Flavonoids
– detmn. of – in plant materials by spectrophotometry and TLC 191
Flavors
– anal. of – by chromatography, gas, multi-dimensional HRGC/FTIR/MS system 87
– detmn. of – by chromatography, gas, trapping and reinjection technique for capillary columns 71
Flow-injection analysis
– aqueous – with FTIR detection 74
– chemical sensors, optical fibre combined with spectrophotometry, ion-exchange, chromatography, HPLC and – 372
– heterogeneous samples in –, blood 93
– heterogeneous samples in –, standard addition 93
– Kalman filter for calibration and quality control in drifting systems, – 74
– potential of – for spectrometry, atomic absorption and spectrometry, ICP, sample injection, automation 745
– strongly reducing agents in –, chromium(II) and vanadium(II) 174
Flunixin
– detmn. (simult.) of phenylbutazone, –, indomethacin and 4-methylaminoantipyrene by ion-pairing HPLC 101
Fluoride
– detmn. of chloride and – in boronated water using ion-selective electrodes 187
– detmn. of – traces by molecular absorption spectrometry 177
– sepn. of microamounts of – coexisting with large amounts of alumina and silica, geological materials by TMS distillation 186
Fluorimetry
– binding parameters, thermodynamic evaluated by phase-resolved – 174
Fluorimetry, laser
– and spectroscopy, ionization, theoretical and analytical considerations for pulsed sources 683
Fluorimetry, phase-resolved
– detmn. of anthracenes by – at two modulation frequencies 65
Fluorine
– detmn. of – in a hollow cathode discharge by monofluoride emission spectra 177
– detmn. of – in geological materials by NAA 186
Fluorobenzenesulfonyl chloride
– anal. of proteins by spectrometry, NMR, ^{19}F, p– as reagent 197
Fly ashes
– detmn. of hydrocarbons, polycyclic aromatic in – by GC/MS 83
Food proteins
– simult. detmn. of – by HPLC and multivariate calibration 88
Foods
– anal. of trichothecene mycotoxins in – by HPLC 88
– detmn. of 4-hydroxynonenal in biological materials and – by HPLC 87
– detmn. of ballast materials in –, comparison of methods 88
– detmn. of cholesterol autoxidation products in – by LC or GC/MS 88
– detmn. of formaldehyde micro amounts in aqueous extracts and model mixtures imitating – by GC 86
– detmn. of lysinoalanine, furosine and pyridosine in – and biological fluids by GLC 87
– detmn. of nitrate in – by enzymatic method 302
– detmn. of pesticides in –, total diet studies, tables 191
– detmn. of selenium in – and biological materials by fluorimetry, a validation study 86
– detmn. of total mercury in – by AAS digestion method 86
– detmn. of vitamin B_2 in – by LC, on line trace enrichment 87
– quality control of – by isotope ratio, mass spectrometry and spectrometry, NMR 760

Forensic science
– thermal analysis in – 93
Formaldehyde
– detmn. of – in air by polarography 80
– detmn. of – micro amounts in aqueous extracts and model mixtures imitating foods by GC 86
Fossil fuels
– anal. of – by NMR, quant. of aromatic aliphatic and heteroatomic groups, degree of condensation of aromatic structure 781
– anal. of – by spectrometry, NMR, high-resolution solution NMR, high-resolution solid-state NMR, 2-dimensional NMR, ^{13}C-NMR, multinuclear methods 781
Fructose
– HPLC of glucose, –, sorbitol and sorbinil in human lens and blood plasma 198
Fruit juices
– sepn. of ascorbic acid, dehydroascorbic acid, diketogulonic acid and glucose in – by HPLC 88
Fruits
– detmn. of ethene from – by GC with FID 87
– detmn. of riboflavin in – and vegetables by HPLC 87
Fundamental parameter method
– spectrometry, X-ray, energy-dispersive, –, influence coefficients method, matrix correction, multielement analysis 825
Furasemide
– detmn. of – in blood plasma and urine by HPLC 101
Furazolidone
– detmn. of – in feeds by LC 191
Furocoumarins
– sepn. of – in plant materials by reversed-phase HPLC 190
Furosine
– detmn. of lysinoalanine, – and pyridosine in foods and biological fluids by GLC 87

G

Gases
– anal. of – by chromatography, gas, sampling and injection apparatus 80
– anal. of noble, diatomic and aliphatic – by HPLC 81
– detect. of solvents and – in toxicology by GC 231
– detmn. of moisture in –, errors in expanding microvolume samples into the absorption cell 81
Gases, inert
– sepn. of – by diffusion chromatography 80
Gases, permanent
– detmn. of – by capillary GC with He ionization detector 80
Gasoline
– detmn. of dyes in waste water and – by thermospray HPLC/MS 189
Gas-phase monitoring
– by chromatography, liquid with gas-phase preconcentrator interface 80
Gene analysis
– limitations of – 212
Genes
– anal. of – 214
– anal. of – in human genome 213
Genome
– anal. of genes in human – 213
Geochemical materials
– detmn. of trace elements in – and environmental materials by spectrometry, X-ray fluorescence, equation for matrix correction 27
Geochemistry
– anal. of geological materials by instrumental analytical techniques, sampling current problems in – 855
Geochemistry
– application of spectrometry, optical emission in – 707
– instrumental analytical techniques in –, AAS, ICP-OES, INAA, isotope dilution MS, XRFS, electron microprobe anal., selection, requirements, comparison 855
Geological analysis
– spectrometry, PIXE, state of the art, applications in –, biochemical analysis, clinical analysis and environmental analysis 635
Geological materials
– activation analysis, thermal neutron in multielement analysis, –, environmental materials, high-purity materials 649
– anal. of – by instrumental analytical techniques, sampling current problems in geochemistry 855
– detmn. of boron in – with a tetrafluoroborate-selective electrode 186
– detmn. of fluorine in – by NAA 186
– detmn. of molybdenum in – by extr. -spectrophotometry, as a different-ligand complex 177
– detmn. of petroporphyrins in – by computerized GC/MS 186
– sepn. of microamounts of fluoride coexisting with large amounts of alumina and silica, – by TMS distillation 186
– spectrochemical analysis of –, application and role 707
Geranylgeraniol
– sepn. of – isomers by HPLC/^{13}C-NMR 84
Glass electrode
– pH-measurements of water with – 186
Glass reference materials
– standard reference materials, biological reference materials, –, application, development, homogeneity, directory 376
Gliocladium enzyme
– sepn. of – components isoelectric focusing 99
Glucosamine-6-phosphate
– porcine kidney tissue based membrane electrodes for – 96
Glucose
– detmn. of – by amperometry with a gel electrode 181
– detmn. of – by enzyme potentiometric sensors 198
– detmn. of – in biological materials, reference methods 207
– HPLC of –, fructose, sorbitol and sorbinil in human lens and blood plasma 198
– sepn. of ascorbic acid, dehydroascorbic acid, diketogulonic acid and – in fruit juices by HPLC 88
– two-dimensional enzyme electrode sensor for – 198
γ-Glutamyltransferase
– sepn. of – by isoelectric focusing 262
Glycerol
– detmn. of – in blood serum and urine by GC-MS 312
– detmn. of – in blood serum by isotope dilution-MS 280
Glycogen phosphorylase
– detmn. of phosphate and – by spectrophotometry at mild pH 100
Glycoproteins
– anal. of sugars in – by HPLC 198
Glycopyrronium
– detmn. of – in blood plasma by capillary GC 196
Glycosaminoglycans
– microassay of – and proteoglycans in tissues 96
Glycyrrhizic acid
– detmn. of – in liquorice extracts by HPLC 87
Gmelin handbook
– , copperorgano compounds 62
Gmelin handbook
– , molybdenum, supplement Vol. A 2a, element, physical properties 168
– , molybdenum, supplement Vol. B4 62
– , tinorgano compounds, Part 12 168
Gold
– detmn. of – by flotation-spectrophotometry 75
– electroreduction of – in aqueous halide and non-aqueous iodide solutions 75
– sepn. of – and platinum metals by chromatography, ion-exchange 171
Gold bearing materials
– optimal averaging of – for analysis 185
Granulocyte elastase
– effect of different dialyzer membranes on the release of – 369
Grapevine roots
– detmn. of ATPase activity in – 85
Grass
– detmn. of molybdenum in – by catalytic method 19
Growth hormone
– detmn. of human – in urine by sandwich enzyme immunoassay 98
Guaifenesin
– assay of mixtures of phenylpropylamine hydrochloride with – or dextromethorphan in solid cough formulations 90

H

Haloacetaldehydes
– detmn. of – and halooxiranes in microsomes by HPLC/fluorimetry 104
Halooxiranes
– detmn. of haloacetaldehydes and – in microsomes by HPLC/fluorimetry 104
Heavy metals
– detmn. of trace – in river sediments and sewage sludges by electrothermal AAS 188
Hemoglobins
– anal. of abnormal – by agar gel electrophoresis 98
– anal. of – after treatment with 4-hydroxy-mercuribenzoate by isoelectric focusing 98
– sepn. of glycosylated – by micro-chromatography 98
– sepn. of abnormal – by fast protein LC 336
Hemolytic activity
– detmn. of – of the complement system 284
Heparin
– detmn. of – in blood plasma, problems in sample preparation 96
– sepn. of oligosaccharides from – by HPLC 96
Hepatocytes
– metabolism of monoiodoglucagon by rat – 348
– phospholipase C as function of ionised calcium in – 344
Herbicides
– detmn. of – in water by solid-phase enzyme immunoassay 191
Heteroatoms
– detmn. of organic bound – in water 223
Hexachloroiridate(IV)
– study of – by voltammetry at carbon paste electrodes 47
High-purity materials
– activation analysis, thermal neutron in multielement analysis, geological materials, environmental materials, – 649
– preconcentration in natural water, –, element speciation 672
Hollow cathode lamps
– as excitation sources for analytical spectrometry, atomic, intensity enhancement using magnetic fields, additional radio frequency and microwave power, pulsing 442
– , auxiliary discharge, booster discharges, low pressure discharges, anal. properties 442

Holographic grating
– anal. of metals by OAS, –, interferometer, Michelson, image detectors, data acquisation and processing, computer control 793
Homovanillic acid
– detmn. of vanillylmandelic acid and – in urine by HPLC with electrochem. detection 95
Hop
– detmn. of sulfur dioxide in – and beer by gas-adsorption chromatography 86
Hormones
– effects of – on metabolism of phospholipids in kidneys 343
Humectants
– detmn. of – in tobacco by TLC 89
Hydralazine
– detmn. of – and metabolites in urine by LC with electrochem. detection 102
– detmn. of – hydrochloride in pharmaceutical products by HPLC 90
Hydrocarbons
– detmn. of – in sedimentary rocks by GC, thermodesorption unit as injection device 186
– sepn. of – by chromatography, gas, on capillary columns packed with $BaSO_4$ 72
– unified retention indices of – separated on squalane by regression anal. 72
Hydrocarbons, chlorinated
– sepn. of – by multidimensional capillary GC 193
Hydrocarbons, halogenated
– detmn. of – in water by GC with ECD 83
– detmn. of – in water, preconc. at the ppt level 83
Hydrocarbons, polycyclic aromatic
– detmn. of – in airborne particulates by GC 83
– detmn. of – in fish by LC 83
– detmn. of – in fly ashes by GC/MS 83
– effects of wavelength range on the simult. quant. of – 181
– fluorescence properties of – in the vapor phase and adsorbed on solid supports 182
– retention behavior of – in HPLC 182
– sepn. of – by LC, retention on polar adsorbents 182
Hydrocarbons, polycyclic aromatic, nitrated
– , book 62
Hydrogen peroxide
– detector, chemiluminescence for – in rain water 82
– detmn. of – in milk by chemiluminescence 86
Hydrogen sulfide
– fraction. of sulfur isotopes between – gas and sulfur containing aqueous solutions 130
– prep. of calibration gas mixtures in – 81
Hydroxyanthraquinones
– as indicators, acid-base 174
3-Hydroxybutyrate
– detmn. of – in blood serum by automated enzymatic anal. 95
β-Hydroxydecanoylthioester dehydrase
– assay of – by HPLC 100
Hydroxy fatty acids
– detmn. of –, thromboxanes and prostaglandins by isotope dilution, GC/MS 199
Hydroxymethylphenidate
– anal. of methylphenidate and p– in biological fluids by GC/MS 103
Hydroxynaphthol blue
– detmn. of calcium in water with – by flow injection anal. 187
4-Hydroxynonenal
– detmn. of – in biological materials and foods by HPLC 87
Hydroxypyrimidines
– detmn. of – with p-dimethylaminobenzaldehyde by spectrophotometry 99
2-(2-(8-Hydroxyquinolyl)azo)-1-naphthol
– detmn. of calcium in potable water with – by spectrophotometry 187

I
Ibuprofen
– assay of – in blood plasma by HPLC 194
– detmn. of – in urine by GC 194
Image detectors
– anal. of metals by OAS, holographic grating, interferometer, Michelson, –, data acquisation and processing, computer control 793
Immunecomplexes
– charact. of – of monoclonal antibodies 253
Immunoassay
– detmn. of kallikrein in urine by bioluminescence enzyme – 266
Immunoblot
– ident. of antibodies by – and immunoprecipitation 251
Immunoelectrophoresis
– immunofixation in comparison to – 250
Immunofixation
– in comparison to immunoelectrophoresis 250
Immunoglobulin A
– detmn. of – by immunoluminometric assays 269
Immunoglobulins
– genes of light chain – 202
– production in transgenic mice 203
Immunoprecipitation
– detmn. of phosphatase, alkaline in biological fluids by – 101
– ident. of antibodies by immunoblot and – 251
Indene estrol
– detection of diethylstilbestrol analogues, – by HPLC/thermospray MS 97
Indicators, acid-base
– hydroxyanthraquinones as – 174
Indomethacin
– detmn. (simult.) of phenylbutazone, flunixin, – and 4-methylaminoantipyrene by ion-paring HPLC 101
Industrial chemistry
– Ullmann's encyclopedia of –, Vol. 2 A, amines to antibiotics 168
Industrial materials
– detmn. of mercury in – by AAS 183
Influence coefficients method
– spectrometry, X-ray, energy-dispersive, fundamental parameter method, –, matrix correction, multielement analysis 825
Information theory
– spectrochemical methods for multicomponent analysis, assessment by –, information content and efficiency optimization, precision 525
Inosine-5′-monophosphate dehydrogenase
– assay of – in tissues by electrophorese 100
Inositol phosphates
– sepn. of – and inositol phosphates, glycerophospho- by HPLC 341
Inositol phosphates, glycerophospho-
– sepn. of inositol phosphates and – by HPLC 341
Insecticides
– sepn. of organic – on polyurethane foam columns 58
– standard deviation in anal. of – by spectrometry, IR and spectrophotometry, UV 74
Instrumental analytical techniques
– anal. of geological materials by –, sampling current problems in geochemistry 855
– in geochemistry, AAS, ICP-OES, INAA, isotope dilution MS, XRFS, electron microprobe anal., selection, requirements, comparison 855
Insulators
– SIMS anal. of – under condition for hydrogen inlet 184
Insulin-like growth factors
– isol. of – from blood plasma 293
Interferometer, Michelson
– anal. of metals by OAS, holographic grating, –, image detectors, data acquisation and processing, computer control 793
Interlaboratory comparison
– evaluation of anal. – and certification of standard reference materials 175
Iodide
– behavior of piezoelectric crystals in solutions, detmn. of – 173
Iodine
– trace anal. of – in air with iodide-selective electrode 79
Iodine radionuclides
– assay of – in environmental samples by radiochem. anal. 190
Ion detection
– mass spectrometry at high mass, ionization techniques, mass analysis and – at high mass, review 486
Ion-exchange
– chemical sensors, optical fibre combined with spectrophotometry, –, chromatography, HPLC and flow-injection analysis 372
Ion exchanger
– polybenzimidazole as new – 299
Ionization techniques
– mass spectrometry at high mass, –, mass analysis and ion detection at high mass, review 486
Iridium
– effect of hydrolysis on detmn. of – with α-benzylmonooxime 78
– sepn. of – and ruthenium by ion flotation 78
Iridium(IV)
– detmn. of – with perazine dimalonate by spectrophotometry 78
Iron
– detmn. of calcium, zinc, manganese, –, magnesium and phosphorus in feeds by ICP-AES 85
– detmn. of cobalt, nickel and – by simult. spectrophotometry 178
– detmn. of – with 2,4,6-tris(2′-pyridyl)-s-triazine and tetraphenylborate by spectrophotometry 178
– detmn. of – with naphthoxyacetylacetophenone by extr.-spectrophotometry 77
Iron(III)
– detection of – and molybdenum(VI) on antimony(V) silicate beads 77
– extr. of chloride complexes of – with dipyrazolonylmethanes 178
Iron ores
– anal. of – by computerized spectrometry, FTIR 185
Isocitrate dehydrogenase
– assay of NADPH-dependent – in blood serum by bioluminescence 100
Isoconcentration analysis
– sub-, superequivalent isotope dilution analysis and – 66
Isocyanates, organic
– detmn. of – in air, review 80
Isoelectric focusing
– sepn. of γ-glutamyltransferase by – 262
– sepn. of membrane proteins by – in immobilized pH gradients 197
Isoprenoid diastereomers
– sepn. of the – by capillary GC, temperature dependence 182
Isotachophoresis
– multichannel spectrophotometric detector for fused-silica capillary tube – 172
– recent developments in – 172
Isotope cluster
– detmn. of selenium using a chromatographic detector based on – 176
Isotope dilution analysis
– sub-, superequivalent – and isoconcentration analysis 66

Isotope ratio
– quality control of foods by –, mass spectrometry and spectrometry, NMR 760

K

Kallikrein
– detmn. of – in urine by bioluminescence enzyme immunoassay 266
Kalman filter
– for calibration and quality control in drifting systems, flow-injection analysis 74
Ketones
– sepn. of enantiomers of alcohols and – by capillary GC with selective complexation 179
Kidneys
– effects of hormones on metabolism of phospholipids in – 343
Kinetic constants
– estim. of – from shape of thermoanalytical curves 173
Kjeldahl digest
– detmn. of ammonia in – 175
Kjeldahl method
– detmn. of nitrogen in sewage sludges, sewage effluents, new catalysts for – 189

L

Labetol
– measurement of – by HPLC with electrochem. detection 102
Lactic acid
– detmn. (simult.) of L(+)- and D(–)– by use of immobilized enzymes in FIA 180
Lactoferrin
– quantit. of human – by ELISA 364
Laminin
– detmn. of procollagen-III-peptide and – 249
LAMMA
– microanalysis, in-situ, trends and perspectives, EPXMA, SIMS, AES, –, PIXE, XPS and others 544
– surface analysis of polymers and catalysts by mass spectrometry, laser, secondary ion mass spectrometry, – and spectroscopy, ESCA 589
Lanthanides
– anal. of – by simulation of ICP emission spectra 75
– derivative spectrophotometry of – 76
– detmn. of – by selective excitation of probe ion luminescence, CaF_2 as host lattice 76
– detmn. of – in phosphoric acid for fertilizers by HPLC with post-column reaction detection 185
– detmn. of – in solution by spectrometry, laser, intercavity 76
– detmn. of – in thorium ores by X-rays in NAA 185
Laser excitation
– for fluorescence spectroscopy, excimer and dye lasers 683
Lead
– detmn. of – and copper after preconc. on iminodiacetic acid-cellulose filters 76
– detmn. of cadmium and – in milk by platform furnace Zeeman AAS 86
– detmn. of nickel, –, zinc and copper in citrus leaves and rice flour by LC 86
Leucine aminopeptidase
– detmn. of – in blood serum with L-leucinamide as substrate 100
Leukocytes
– anal. of polymorphonuclear – by chemiluminescence 360
– chemiluminescence of stimulated polymorphonuclear – 362
– detmn. of redox activity of – by flow cytometry 270
– elastase contents and release of polymorphonuclear – 359
Lichen substances
– detmn. of – by pyrolysis/chemical ionization MS 84
Liesegang filters
– detmn. of anions in air by HPLC, after adsorption in – 79
Lignocellulose
– detmn. of – in plant materials by FTIR spectrometry 84
Limit of detection
– , limit of determination in AES, influence of spectral interferences and resolving power 397
– spectrometry, X-ray, application of total reflexion and polarized X-rays, improvement of – 865
– spectrometry, X-ray, energy-dispersive, state and trends, selectivity, sensitivity, –, comparison with wavelength-dispersive XRS 825
Limit of determination
– limit of detection, – in AES, influence of spectral interferences and resolving power 397
Lindane
– detmn. of atrazine, –, pentachlorophenol and diazinon in water and soils by isotope dilution GC/MS 85
Lipids
– peroxidation products of – 217
– spectrometry, IR of biological materials, proteins, –, carbohydrates, nucleic acids, relevant studies 655
Lipoproteins
– anal. of plasma – 217
Lipoprotein X
– detmn. of – in blood serum by enzymatic anal. 96
Liposome lysis
– fluorescence assay of – using 4-methylumbelliferyl-β-d-glucuronide 94
Lipoxygenase
– inhibition of – pathway 368
Liquorice extracts
– detmn. of glycyrrhizic acid in – by HPLC 87
Lithium
– chromogenic aza-12-crown-4 as a selective reagent for – ion 74
LSD
– sepn. of ergot alkaloids in illicit – by HPLC 92
Luminescence lifetime
– measurements, phase plane method 65
Lymphocytes
– detmn. of cyclic nucleotides in T– by HPLC 317
Lysinoalanine
– detmn. of –, furosine and pyridosine in foods and biological fluids by GLC 87

M

Macromolecules
– conc. of – by electrophoresis, apparatus 193
– NMR studies of enzymes, –, cells, tissues, listing of information 437
Magnesium
– detmn. of calcium, zinc, manganese, iron, – and phosphorus in feeds by ICP-AES 85
– detmn. of – in blood serum and urine with xylidyl blue-1 by Cobas Mira Analyzer 297
– detmn. of potassium, sodium, calcium and – in dialysis fluid by capillary isotachophoresis 94
– titration of calcium and – in water with EDTA, problems by high alkalinity 82
Manganese
– detection of cobalt and – in chromatography, ion, electrocatalytic effect 66
– detmn. of calcium, zinc, –, iron, magnesium and phosphorus in feeds by ICP-AES 85
– detmn. of nickel and – with PAN by substoichiometric method 178
Marcellomycine
– polarographic study of – 91
Marine materials
– detmn. of elements in –, certification of mussels tissue powder as reference materials 194
Masking reagents
– new data on – in complexometry, review 173
Mass analysis
– mass spectrometry at high mass, ionization techniques, – and ion detection at high mass, review 486
Mass measurements
– negative chemical ionization and accurate – for a linked system chromatography, gas/spectrometry, FT-IR/mass spectrometry, FT 839
Mass spectrometry
– acetone CI – of monosaccharides 181
– anal. of organic compounds by –, structural interpretation by LAMMA 66
– anal. of zircon by – after microbial leaching 37
– at high mass, ionization techniques, mass analysis and ion detection at high mass, review 486
– chromatography, liquid/–, gas-phase ionization in thermospray interface 170
– computer-based system for correlating molecular structures with – data 74
– desorption ionization of cesium iodide by FT – 183
– detmn. of trace carbon in silicon layers by secondary ion –, on-line ion implantation 184
– detmn. of trace metals in seawater by ICP – 81
– differentiation of tobacco blends by pyrolysis FI – and pattern recognition 9
– direct liquid introduction interface for capillary chromatography, liquid/– 170
– elemental analysis by – 886
– elemental analysis by –, high accuracy 601
– micro chromatography, liquid/–, direct liquid introduction 170
– , new scan modes with a hybrid BEQQ spectrometer 66
– , nitryne and methyne transfer as beam induced reactions in SIMS 66
– pulsed laser desorption for resonance ionization – 170
– quality control of foods by isotope ratio, – and spectrometry, NMR 760
– quant. FAB – of silylated silica surfaces 67
– quant. – without standard reference samples 170
– stereoisomer differentiation of 2-acetamido-2-deoxyhexose by – 198
– surface analysis of polymers and catalysts by mass spectrometry, laser, secondary ion –, LAMMA and spectroscopy, ESCA 589
– trace analysis and microanalysis by –, isotope dilution, thermal ionization, spark source, electron impact ionization, ICP, microwave induced plasma, comparison of accuracy 601
Mass spectrometry, FT
– negative chemical ionization and accurate mass measurements for a linked system chromatography, gas/spectrometry, FT-IR/– 839
Mass spectrometry, ICP
– anal. of water by – 222
Mass spectrometry, isotope dilution
– detmn. of steroids and uric acid by – as reference methods 208
Mass spectrometry, laser
– surface analysis of polymers and catalysts by –, secondary ion mass spectrometry, LAMMA and spectroscopy, ESCA 589
Mass spectrometry, laser desorption
– anal. of amino acids and dipeptides by –, influence of wavelength 66
Materials technology
– surface analysis of – within a computer industry, overview 426

Medical diagnosis
– NMR imaging, spectrometry, NMR in vivo, biochemical analysis, – 767
Megestrol acetate
– detmn. of – in blood plasma by HPLC 103
Melphalane
– monitoring of chem. destruction of 6-mercaptopurine, 6-thioguanine and – 91
Membrane electrodes
– porcine kidney tissue based – for glucosamine-6-phosphate 96
Menazon
– electroanal. studies of the pesticide – and its hydrolysis products 192
Mercaptoethanol
– cathodic stripping voltammetry of 2– 180
6-Mercaptopurine
– monitoring of chem. destruction of –, 6-thioguanine and melphalane 91
Mercury
– detmn. of – in industrial materials by AAS 183
– detmn. of sub-ng/ml levels of – in water by electrolytic deposition and EAAS 187
– detmn. of total – in foods by AAS digestion method 86
Mercury(II)
– chelating reagents, sulfur-containing in amperometric titration of – and copper(II) 174
– sepn. of uranium(VI), aluminum, strontium, barium and – by cation exchange chromatography in aqueous ammonium acetate 66
Mercury film electrodes
– prep. of – modified by TOPO 172
Metal chelates
– chromatography, thin-layer of –, dialkylthiobenzoyl-thiourea 127
Metaldehyde
– detmn. of – in blood plasma and urine by GC 94
Metal ions
– ion-exchange chromatography of bivalent – by conductivity detection 66
– preconcentration of – on modified silica gel 173
Metallurgical materials
– detmn. of vanadium with carminic acid and cetyltrimethylammonium chloride in – 183
Metals
– anal. of corrosion and oxidation, surface analysis of steel, Cr-Ni alloys and – by spectrometric methods, depth profiles 625
– anal. of – by OAS, holographic grating, interferometer, Michelson, image detectors, data acquisation and processing, computer control 793
– detmn. of – as cyanide complexes by potentiometric titration 179
– detmn. of silver traces in some – by voltammetry 182
– multielement analysis of –, alloys, steel by spectrometry, optical atomic emission, spark source, arc source, d.c. arc, review 793
– preconcentration and presepn. by electrodeposition of traces of – 173
– sepn. of – in biological materials by radiochemical NAA 13
– speciation of bound and free – in biological materials 94
– spectroscopy, ESCA, spectroscopy, photoelectron, microscopy, SAM and SIMS of – 625
Metformin
– detmn. of – and moroxidine with Cu(II) 91
Methenamine
– detmn. of – in dosage forms using ion-pair extr. 89
3-Methoxy-4-hydroxymandelic acid
– detmn. of – in urine 322
4-Methylaminoantipyrene
– detmn. (simult.) of phenylbutazone, flunixin, indomethacin and – by ion-pairing HPLC 101
Methylhippuric acid
– detmn. of – in urine by HPLC and isotachophoresis 95
Methyl parathion
– detmn. of ethyl parathion and – in green vegetables and surface water by HPLC 192
Methylphenidate
– anal. of – and p-hydroxymethylphenidate in biological fluids by GC/MS 103
Methylprednisolone
– assay of – in blood plasma by HPLC 97
3-Methylthymidine
– detmn. of – as diacetylated derivative by GC/ECD 199
4-Methylumbelliferyl-β-d-glucuronide
– fluorescence assay of liposome lysis using – 94
Microanalysis
– trace analysis and – by mass spectrometry, isotope dilution, thermal ionization, spark source, electron impact ionization, ICP, microwave induced plasma, comparison of accuracy 601
Microanalysis, in-situ
– , trends and perspectives, EPXMA, SIMS, AES, LAMMA, PIXE, XPS and others 544
Microbial leaching
– anal. of zircon by mass spectrometry after – 37
Microsampling
– in spectrometry, Raman, linear, SERS 642
Microscopy, SAM
– spectroscopy, ESCA, spectroscopy, photoelectron, – and SIMS of metals 625
Microsomes
– detmn. of haloacetaldehydes and halooxiranes in – by HPLC/fluorimetry 104
Milk
– detmn. of ascorbic acid in – and whey by HPLC 88
– detmn. of cadmium and lead in – by platform furnace Zeeman AAS 86
– detmn. of free oligosaccharides in human –, immunostaining on thin-layer chromatograms 198
– detmn. of hydrogen peroxide in – by chemiluminescence 86
– direct detmn. of trace elements in – by electrothermal AAS 85
Milk powder
– detmn. of copper in – by AAS and AES 86
Mineral phases
– detmn. of elements, compounds and – in archeological materials by analytical spectroscopic methods 875
Mitoxantrone
– detection of – in blood plasma and urine by HPLC 195
Mitozolomide
– anal. of – in biological fluids by HPLC 195
Moisture
– detmn. of – in gases, errors in expanding microvolume samples into the absorption cell 81
Molecular structures
– computer-based system for correlating – with mass spectrometry data 74
Molecules, unstable
– spectrometry, FT-IR, spectrometry, IR, laser for –, matrix isolation, liquid noble gases solvents, time-resolved studies 819
– spectrometry, IR for –, detection, charact. and monitoring 819
Molybdenum
– detmn. of – in geological materials by extr.-spectrophotometry, as a different-ligand complex 177
– detmn. of – in grass by catalytic method 19
– detmn. of trace – and vanadium in water, preconcentration, AAS, ICP-OES 298
– detmn. of tungsten and – in sedimentary rocks by polarography 186
– Gmelin handbook, –, supplement Vol. A 2a, element, physical properties 168
– Gmelin handbook, –, supplement Vol. B4 62
Molybdenum(VI)
– detection of iron(III) and – on antimony(V) silicate beads 77
– detmn. of – in sea water after preconc. 188
– extract. of – from aqueous mineral acids using di-(2-ethylhexyl)phosphate 137
Molybdenum blue
– evaluation of several – methods for detmn. of ortho phosphate 176
Molybdenum trioxide
– detmn. of – and tungsten trioxide in catalysts by Raman spectrometry 183
Monoamine oxidase
– detmn. of – with azino-di(3-ethylbenzthiazoline-6-sulfonate) 307
Monochloramine
– detmn. of chlorine with N,N-diethyl-p-phenylenediamine, interference by – 177
Monoiodoglucagon
– metabolism of – by rat hepatocytes 348
Monosaccharides
– acetone CI mass spectrometry of – 181
Moroxidine
– detmn. of metformin and – with Cu(II) 91
Morphine
– detmn. of –, codeine and dihydrocodeine in blood by HPLC with electrochem. detection 104
Multicomponent analysis
– spectrochemical methods for –, assessment by information theory, information content and efficiency optimization, precision 525
Multielement analysis
– activation analysis, thermal neutron in –, geological materials, environmental materials, high-purity materials 649
– instrumental –, book 61
– of environmental samples by spectrometry, X-ray fluorescence, total reflection, activation analysis, neutron and spectrometry, ICP-OES 662
– of metals, alloys, steel by spectrometry, optical atomic emission, spark source, arc source, d.c. arc, review 793
– spectrometry, X-ray, energy-dispersive, fundamental parameter method, influence coefficients method, matrix correction, – 825
Multivariate analysis
– extension of the – for component-resolution to three components 74
– predicting retention data in chromatography, gas by – 73
Mussels
– detmn. of elements in marine materials, certification of – tissue powder as reference materials 194
Mustard gas
– detection of –, bis(2-chloroethyl)-sulfide in urine by GC 104
Myeloperoxidase
– quantitat. of – from granulocytes by ELISA 365
Myo-inositol
– detmn. of – in blood serum by enzymatic assay 304

N

Naphthoxyacetylacetophenone
– detmn. of iron with – by extr.-spectrophotometry 77
Natural substances
– simple and mixed ligand complexes of copper(II) with polyfunctional phenolic compounds as models of – 190
Negative chemical ionization
– and accurate mass measurements for a linked system chromatography, gas/spectrometry, FT-IR/mass spectrometry, FT 839
Neurotransmitters
– detmn. of – in rat brain tissue by HPLC 321

Nickel
– detmn. of – and cobalt in natural water and biological materials by chronopotentiometric stripping anal. 188
– detmn. of – and manganese with PAN by substoichiometric method 178
– detmn. of – and palladium with xanthates by extr. spectrophotometry 77
– detmn. of arsenic, scandium, chromium, cobalt and – in asbestos by NAA 185
– detmn. of cobalt, – and iron by simult. spectrophotometry 178
– detmn. of –, lead, zinc and copper in citrus leaves and rice flour by LC 86
– sepn. of cobalt, copper and – as diethyldithiocarbamates by HPTLC 178
– sepn. of copper, cobalt, –, chromium and vanadium chelates with 5-Br-PAPS by HPLC 178
Nickel-triosmium carbonyl
– behavior of a tetrahedral – cluster with group V donor ligands in HPLC 179
Nicotinamide nucleotide transhydrogenase
– sepn. of – by affinity chromatography 100
Nicotine
– detmn. of – and cotinine in urine by GC 104
– detmn. of – and cotinine in urine by HPLC 104
– detmn. of – and N-methylnicotinium ion by HPLC with electrochem. detection 88
Nifursol
– detmn. of – in feeds by HPLC 85
Niobium
– detmn. of – in alloys with triazene-N-oxides by fluorimetry 77
Nitrate
– detmn. of – in foods by enzymatic method 302
Nitrates
– detmn. of – in water by second derivative UV spectrometry 187
Nitrite
– detmn. of – with pyridine-4-carboxylic acid hydrazide 175
Nitrobenzanthracenes
– ident. of the decomposition products of – in solution 83
Nitrogen
– detmn. of – and carbon in silicon by photon activation 184
– detmn. of – in sewage sludges, sewage effluents, new catalysts for Kjeldahl method 189
NMR imaging
– , spectrometry, NMR in vivo, biochemical analysis, medical diagnosis 767
Noise
– optimal peak area detmn. in the presence of – 174
Nomifensine
– assay of – metabolites in blood plasma by HPLC with UV detection 194
Nucleic acids
– spectrometry, IR of biological materials, proteins, lipids, carbohydrates, –, relevant studies 655
– staining of – in polyacrylamide gels after complexing with nitroso compounds 99
Nucleic bases
– sepn. of –, nucleosides and nucleoside phosphates by chromatography, HPLC 316
Nucleoside phosphates
– sepn. of nucleic bases, nucleosides and – by chromatography, HPLC 316
Nucleotides
– detmn. of cyclic – in T-lymphocytes by HPLC 317
– sepn. of – and proteins by ultracentrifugation in cesium trifluoroacetate gradients 99

O

Ofloxacin
– detmn. of – in biological fluids by HPLC 354
– detmn. of – in body fluids by HPLC 355
Oils
– detmn. of dibenzodioxins, polychlorinated and dibenzofurans, polychlorinated in – by GC/MS 23
– detmn. of triglycerides in fats and – by capillary GC, phenylmethylsilicone stationary phase 87
Oligopeptides
– sepn. of – by chromatography, thin-layer, new reversed-phase plates 73
Oligosaccharides
– detmn. of free – in human milk, immunostaining on thin-layer chromatograms 198
– sepn. of – from heparin by HPLC 96
Oncogenes
– expression of – 221
– hormonal regulation of – expression 220
– in mouse development 220
– malign transformation by – 219
Opioid peptides
– radioreceptor assay of –, peptides in canine brain regions 96
Optical fibres
– plasma for special applications, purification of silicon, purification of silica for –, spectrometry, emission 384
Optrodes
– remote and in-situ analysis, process control, use of selective sensors, optical, – 618
Organic acids
– detmn. of carbohydrates, – and sugar alcohols in seminal plasma by HPLC 198
– detmn. of – in aqueous samples, simplex optimization of extr. alkylation 180
– detmn. of – in blood plasma, "anion gap", by HPLC 330
Organic compounds
– anal. of – by mass spectrometry, structural interpretation by LAMMA 66
– detmn. of oxygen isotopes ratios in – by $HgCl_2$ pyrolysis and MS 179
– structure elucidation of –, automated system, computer-assisted, CHEMICS 750
Organic matter
– environmental analysis, airborne particulates, soils, sediments, rain, sea and river water, – 662
Organic substances
– total and group parameters for detmn. of – in water 225
Osmium
– detmn. of palladium and – with propionyl promazine phosphate by spectrophotometry 179
Osmium(VIII)
– detmn. of – with thiomalic acid by amperometric titration 77
Oxalate
– detmn. of – in urine, comparison of enzymatic and ion-chromatographic methods 303
Oxamniquine
– detmn. of – in blood plasma by HPLC 103
Oxidants
– potentiometric detmn. of – and reductants 174
Oxidation
– anal. of corrosion and –, surface analysis of steel, Cr-Ni alloys and metals by spectrometric methods, depth profiles 625
Oxpentifylline
– detmn. of – metabolites in urine by HPLC 102
Oxygen demand
– of water, COD and BOD 224
Oxygen isotopes
– detmn. of – ratios in organic compounds by $HgCl_2$ pyrolysis and MS 179
Oxytetracycline
– detmn. of tetracycline and – by pH-induced difference spectrophotometry 91
– kinetic detmn. of tetracycline and – using spectrophotometry 91
Ozone
– detmn. of – in water by gas diffusion flow injection analysis 187

P

Paintings
– technol. investig. of mural – 147
Palladium
– detmn. of – and osmium with propionyl promazine phosphate by spectrophotometry 179
– detmn. of – and platinum with dithizone by extr. spectrophotometry 78
– detmn. of – in catalysts with 4(5)-D-arabino-tetrahydroxybutylimidazoline-2-thione by spectrophotometry 77
– detmn. of nickel and – with xanthates by extr. spectrophotometry 77
– detmn. of rhodium and – by extr. of their dithiocarbamates and HPLC 178
PAN
– detmn. of nickel and manganese with – by substoichiometric method 178
Papaverine
– detmn. of – hydrochloride with tetrachlorofluorescein and Pd(II) by spectrophotometry 92
Paracetamol
– detmn. of – in blood serum 353
Parathyroid hormone gene
– anal. of human – 273
Particulates
– detmn. of antimony in air, – by AAS/hydride generation 79
Pattern recognition
– differentiation of tobacco blends by pyrolysis FI mass spectrometry and – 9
– of multivariate analytical data by plots of high-dimensional data 175
Peak area
– optimal – detmn. in the presence of noise 174
Pentachlorophenol
– detmn. of atrazine, lindane, – and diazinon in water and soils by isotope dilution GC/MS 85
Pentafluorobenzyl p-toluenesulfonate
– for detmn. of anions by GC 174
Peptides
– radioreceptor assay of opioid peptides, – in canine brain regions 96
– sepn. of – and proteins by HPLC on gel columns 96
Perrhenate
– liquid –selective electrode 177
Pesticides
– anal. of –, harmonization of standardization of reference substances 191
– anal. of – in biological materials 231
– anal. of – in soils by TLC, movement and leachability 85
– anal. of –, quality assurance in the lab. 191
– detmn. of – in foods, total diet studies, tables 191
– detmn. of organochlorine – in swine and beef fats by GC 192
Petroleum fractions
– anal. of – by on-line HPLC/GC coupling 69
Petroporphyrins
– detmn. of – in geological materials by computerized GC/MS 186
PGE-M
– half-life of – in human urine 97
Pharmaca
– anal. of – and drugs 233
Pharmaceutical analysis
– , reactivity, stability, analysis, book 169
Pharmaceutical products
– detmn. of aminacrine hydrochloride in – by TLC with fluorescence detection 93
– detmn. of atropine in – by LC with fluorescence detection 92
– detmn. of cimetidine in – by polarography 90

Pharmaceutical products
– detmn. of colchicine in – by LC 92
– detmn. of enalapril in – by flow-injection anal. 90
– detmn. of hydralazine hydrochloride in – by HPLC 90
– detmn. of propylene carbonate in – by reversed-phase HPLC 93
– detmn. of pyrethrins in – by HPLC 192
– detmn. of residues of – in poultry tissue 88
– detmn. of troxerutin in – by reversed-phase HPLC 92
– detmn. of vitexine in –, plant extracts by HPLC 92
Phase boundaries
– with X-ray interference fields, polarization, X-ray microprobe, X-ray absorption, X-ray absorption fine structure, standing X-ray wave fields 786
Phenobarbital
– detmn. of theophylline, caffeine and – in blood plasma by HPLC 102
Phenol
– detect. of – and alkylphenols at workplaces 142
– detmn. of – traces in water by molecular-emission spectrometry 82
– sepn. of cobalt complexes and platinum complexes by chromatography, paper with – containg solvents 178
Phenolic acids
– sepn. of – from plant materials by HPLC 190
Phenolic compounds
– simple and mixed ligand complexes of copper(II) with polyfunctional – as models of natural substances 190
Phenol red
– pH-measurements in sea water using – 186
Phenothiazines
– detmn. of – with diazotized p-nitroaniline 90
Phenothrin
– detmn. of d– and its optical isomers by LC and GC 192
Phenylbutazone
– detmn. (simult.) of –, flunixin, indomethacin and 4-methylaminoantipyrene by ion-pairing HPLC 101
Phenylpropylamine
– assay of mixtures of – hydrochloride with guaifenesin or dextromethorphan in solid cough formulations 90
Phenylurea herbicides
– detmn. of – in soils by HPLC with electrochem. detection 192
Phenytoin
– first derivative spectrophotometric detmn. of – 90
pH-measurements
– in sea water using phenol red 186
– of water with glass electrode 186
Phosphatase, alkaline
– assay of – in biological materials with coumarin-derived substrates 101
– detmn. of – in biological fluids by immuno-precipitation 101
Phosphate
– detmn. of – and glycogen phosphorylase by spectrophotometry at mild pH 100
– detmn. of ethyl phosphite, phosphite and – in plant tissues by HPLC/GC 84
– evaluation of several molybdenum blue methods for detmn. of ortho – 176
Phosphate rocks
– detmn. of uranium and radium in – and phosphoric acid by radiometry and spectrophotometry 33
Phosphite
– detmn. of ethyl phosphite, – and phosphate in plant tissues by HPLC/GC 84
Phosphoglycerides
– assessment of non-esterified fatty acids and – in myocardial tissues by silica gel column chromatography 199
Phosphoinositides
– and prostaglandins 238
– detmn. of – turnover 236
– role of – 236
Phospholipase A
– detmn. of – in blood serum 308
Phospholipase C
– as function of ionised calcium in hepatocytes 344
Phospholipid membrane
– Langmuir-Blodgett film characteristics and – ion conduction 93
Phospholipids
– anal. of – by chromatography, review 97
– effects of hormones on metabolism of – in kidneys 343
Phosphoric acid
– automatic potentiometric control in the manufacture of – 185
– detmn. of lanthanides in – for fertilizers by HPLC with post-column reaction detection 185
– detmn. of uranium and radium in phosphate rocks and – by radiometry and spectrophotometry 33
Phosphorus
– detmn. of calcium, zinc, manganese, iron, magnesium and – in feeds by ICP-AES 85
– detmn. of – traces by thermal-lens spectrophotometry 175
Photothermal refraction
– detmn. of amino acids by chromatography, liquid, – as detector 172
pH sensor
– evaluation of the zirconia – at 95°C 172
Phthalic anhydride
– detmn. of diisocyanates and acid anhydrides, – in air by HPLC 80
Phyllanthoside
– assay of – and its stability in blood plasma by HPLC 195
Physiological fluids
– detmn. of antiepileptic drugs in – by HPLC, column switching 326
– detmn. of theophylline in human – by HPLC, column switching 327
Physostigmine
– detmn. of – in biological fluids by LC using dual-electrode electrochem. detection 196
Pibenzimol
– assay of – in biological fluids by HPLC 195
Piezoelectric crystals
– behavior of – in solutions, detmn. of iodide 173
Pilocarpine
– 2,3-dichloro-5,6-dicyano-p-benzoquinone in assay of codeine, emetine and – 92
Plankton
– detmn. of selenium in – and sediments by hydride AAS 82
Plant extracts
– detmn. of vitexine in pharmaceutical products, – by HPLC 92
– sepn. of secoiridoid glycosides from – by reversed-phase HPLC 191
Plant materials
– anal. of – by HPLC, selectivity of glassy carbon electrochem. detector 190
– detmn. of copper(I) in – with salicylaldehyde thiosemicarbazone by spectrophotometry 190
– detmn. of flavonoids in – by spectrophotometry and TLC 191
– detmn. of lignocellulose in – by FTIR spectrometry 84
– detmn. of terpenes in – by GC, after extr. with ethanol 84
– detmn. of water in –, extr. with DMSO instead of drying 84
Plant materials
– sampling and sample preparation of tree needles, – for element analysis 158
– sepn. of furocoumarins in – by reversed-phase HPLC 190
– sepn. of phenolic acids from – by HPLC 190
Plant oils
– anal. of essential oils, – by capillary GC/MS, direct sampling 84
Plants
– anal. of volatile compounds released by – by capillary GC, dynamic headspace system 84
– extr. of elements from – into solution using supersound 190
– X-ray fluorescence analysis in agricultural chemistry, –, feeds, fertilizers, soils, sludges, water and others 720
Plant tissues
– detmn. of ethyl phosphite, phosphite and phosphate in – by HPLC/GC 84
Plasma
– at normal and reduced pressure 384
– for special applications, purification of silicon, purification of silica for optical fibres, spectrometry, emission 384
Platinum
– detmn. of palladium and – with dithizone by extr. spectrophotometry 78
Platinum(IV)
– potentiometric titration of – by thallium(I) 179
Platinum complexes
– sepn. of cobalt complexes and – by chromatography, paper with phenol containg solvents 178
Platinum metals
– detmn. of – in their compounds using decomposition by BrF_3 78
– sepn. of gold and – by chromatography, ion-exchange 171
– theory of flame spectrometry, atomic absorption, atomisation of – 64
Plutonium
– potentiometric detmn. of free acidity in uranium(VI) and – solutions and of uranium 184
Polyacrylamide
– detmn. of partially hydrolyzed – polymers in oil field production water 189
Polybenzimidazole
– as new ion exchanger 299
Poly(N,N-dimethylaniline)
– film with ion-exchange properties as electrodes modifier 172
Polygodials
– detmn. of of enantiomeric – by GC with FID 93
Polymers
– surface analysis of – and catalysts by mass spectrometry, laser, secondary ion mass spectrometry, LAMMA and spectroscopy, ESCA 589
Polyols
– estimat. of plant cyclitols and – by GC 338
Polyphosphoinositide
– inhibition of – breakdown and prostaglandin synthesis in rat cells by proteins, islet-activating 342
– stimulated – metabolism 238
Polythenes
– detmn. of arsenic and selenium in butter and – by oxygen bomb combustion 86
Porphyrin esters
– sepn. of – by HPLC on aminopropyl-bounded silica 98
Potassium
– detmn. of – in water by spectrophotometry 187
– detmn. of –, sodium, calcium and magnesium in dialysis fluid by capillary isotachophoresis 94
Poultry
– detmn. of residues of pharmaceutical products in – tissue 88

Preconcentration
– and presepn. by electro-deposition of traces of metals 173
– in natural water, high-purity materials, element speciation 672
– of metal ions on modified silica gel 173
– of trace metals in natural water with a new hydrazone 81
– techniques for trace analysis, inorganic, votalization, LL-extr., precipitation, electrochem. deposition, sorption, ion-exchange, LC, flotation, freezing and zone melting 672
Primaquine
– detmn. of – in whole blood and urine by HPLC 103
Process control
– remote and in-situ analysis, –, use of selective sensors, optical, optrodes 618
– specific detmn. with chemical sensors, optical fibre, – 372
Procollagen-III-peptide
– detmn. of – and laminin 249
Progesterone
– detmn. of – by LC/MS using a moving-belt interface and isotope dilution 97
– detmn. of – in saliva by RIA 288
Propionyl promazine phosphate
– detmn. of palladium and osmium with – by spectrophotometry 179
Propylene carbonate
– detmn. of – in pharmaceutical products by reversed-phase HPLC 93
Prostaglandin
– inhibition of polyphosphoinositide breakdown and – synthesis in rat cells by proteins, islet-activating 342
Prostaglandins
– detmn. of hydroxy fatty acids, thromboxanes and – by isotope dilution, GC/MS 199
– detmn. of – in blood plasma by HPLC, column switching 97
– detmn. of – in urine 295
– phosphoinositides and – 238
Proteinases
– and xylosyltransferase in inflammatory processes 227
– as inflammatory mediators 226
Protein, islet-activating
– inhibition of polyphosphoinositide breakdown and prostaglandin synthesis in rat cells by – 342
Proteins
– anal. of amino acids in – by pyrolysis and MS 5
– anal. of – by spectrometry, NMR, ^{19}F, p-fluorobenzenesulfonyl chloride as reagent 197
– anal. of – in urine by electrophoresis, SDS-PAA 265
– detection of – in electrophoresis, silver staining in polyacrylamide gels 197
– detection of – in electrophoresis, staining with Coomassie blue dyes 197
– detmn. of calcium-binding activity of – using a nitrocellulose membrane 197
– detmn. of –, immobilized on various matrices with Coomassie blue 197
– detmn. of – in immobilized enzymes by derivative UV 281
– detmn. of – on nitrocellulose filter by dye-staining 197
– detmn. of total – in blood plasma with tyrosinase enzyme electrode 197
– ident. of – in blood plasma by two-dimensional electrophoresis, mapping 197
– new staining reagents for – on polyacrylamide 263
– non-enzymatic glucosylation of – 275
– sepn. of membrane – by isoelectric focusing in immobilized pH gradients 197
Proteins
– sepn. of nucleotides and – by ultra-centrifugation in cesium trifluoroacetate gradients 99
– sepn. of peptides and – by HPLC on gel columns 96
– spectrometry, IR of biological materials, –, lipids, carbohydrates, nucleic acids, relevant studies 655
Proteins, biotin-labeled
– detect. of – in polyacrylamide gels 263
Proteochondroitin sulfate
– in endothelial cells 257
Proteoglycan
– populations 257
Proteoglycans
– microassay of glycosaminoglycans and – in tissues 96
Proteoheparan sulfate
– cell surface receptor for – 347
– release of – 255
– response of liver – 366
Pseudouridine
– anal. of – by fluorescence spectrometry 98
– detmn. of – and uric acid in urine and blood serum by HPLC 99
– detmn. of – by cathodic stripping voltammetry 98
Purines
– sepn. of –, pyrimidines, ribonucleosides and deoxyribonucleosides by reversed-phase HPLC, stationary phases 98
Pyrethrins
– detmn. of – in pharmaceutical products by HPLC 192
Pyridine-4-carboxylic acid hydrazide
– detmn. of nitrite with – 175
Pyridosine
– detmn. of lysinoalanine, furosine and – in foods and biological fluids by GLC 87
Pyridoxal
– detmn. (simult.) of – and pyridoxal 5-phosphate in blood serum by flow injection anal. 199
Pyridoxal 5-phosphate
– detmn. (simult.) of pyridoxal and – in blood serum by flow injection anal. 199
Pyrimidine bases
– sepn. of – by HPLC, study of various bonded phases 182
Pyrimidines
– sepn. of purines, –, ribonucleosides and deoxy-ribonucleosides by reversed-phase HPLC, stationary phases 98
5-Pyrrolidone-2-carboxylic acid
– HPLC of 4-bromomethyl-7-methoxycoumarin ester derivative of – in biological tissues with fluorimetric detection 199

Q

Quality assessment
– reference method values to external – 277
Quality control
– clinical analysis with reagents, carrier-bound, – 245
– environmental reference materials, production, homogeneity, stability, analytical – 678
– of analyses with reagents, carrier-bound 244
– of foods by isotope ratio, mass spectrometry and spectrometry, NMR 760
Quartz resonator
– oscillation frequency of a – in contact with liquid 173
8-Quinolinol
– detmn. of vanadium(V) with – by spectrophotometry, in the presence of nonionic surfactant 176

R

Radiochemical analysis
– computer program for optimization of – techniques 649
– , present state 649
Radium
– detmn. of uranium and – in phosphate rocks and phosphoric acid by radiometry and spectrophotometry 33
Ranitidine
– detmn. of ampicillin, –, thioethers in blood plasma by HPLC with on-line generated bromine 103
Ranitidine
– detmn. of – by polarography 89
Reagents, carrier-bound
– clinical analysis with –, quality control 245
– quality control of analyses with – 244
Redox activity
– detmn. of – of leukocytes by flow cytometry 270
Redox titrations
– graphical approach to – 53
Reductants
– assay of clinically important – by chemi-luminescence delay technique 94
– potentiometric detmn. of oxidants and – 174
Reference materials
– detmn. of elements in marine materials, certification of mussels tissue powder as – 194
– detmn. of trace elements in environmental samples, accuracy, – 678
Reference methods
– detmn. of creatinine by chromatography, HPLC, as – 209
– detmn. of electrolytes in blood serum, – 205
– detmn. of glucose in biological materials, – 207
– detmn. of steroids and uric acid by mass spectrometry, isotope dilution as – 208
– for clinical analysis 204
Reference method values
– to external quality assessment 277
Renin inhibitors
– ident. of – in blood plasma by gel chromatography 101
Resolving power
– spectrometry, atomic emission, background correction, concept of selectivity, practical –, instrumentation for high spectral resolution 397
Retention data
– detmn. of thermodynamic characteristics from – in chromatography, gas 72
– predicting – in chromatography, gas by multivariate analysis 73
Retention indices
– chromatography, gas, temperature programmed – 73
– chromatography, gas, thermodynamic characteristics and isothermal – 73
– unified – of hydrocarbons separated on squalane by regression anal. 72
Retinoic acids
– detmn. of – in blood plasma by GC/MS 98
Rhenium
– detmn. of – in presence of large amounts of molybdenum 177
Rhodium
– detmn. of – and palladium by extr. of their dithiocarbamates and HPLC 178
– detmn. of – by AAS, interference study 179
Riboflavin
– detmn. of – in fruits and vegetables by HPLC 87
Ribonuclease
– detmn. of – in urine 310
Ribonucleosides
– sepn. of purines, pyrimidines, – and deoxyribo-nucleosides by reversed-phase HPLC, stationary phases 98

Rice flour
– detmn. of nickel, lead, zinc and copper in citrus leaves and – by LC 86
Römpps encyclopedia
– of chemistry 61
Ruthenium
– sepn. of iridium and – by ion flotation 78

S

Saccharomyces strains
– detmn. of amino acids in –, yeast strains by GC 95
Salicylaldehyde thiosemicarbazone
– detmn. of copper(I) in plant materials with – by spectrophotometry 190
Salicylamide
– detmn. of acetaminophen, – and codeine phosphate by pH-induced difference spectrophotometry 90
Saliva
– detmn. of cortisol in – by RIA 260
– detmn. of estriol in – by RIA 289
– detmn. of progesterone in – by RIA 288
Sample injection
– potential of flow-injection analysis for spectrometry, atomic absorption and spectrometry, ICP, –, automation 745
Sample preparation
– sampling and – of tree needles, plant materials for element analysis 158
Sampling
– anal. of geological materials by instrumental analytical techniques, – current problems in geochemistry 855
– and sample preparation of tree needles, plant materials for element analysis 158
Scandium
– detmn. of arsenic, –, chromium, cobalt and nickel in asbestos by NAA 185
– detmn. of – using semi-xylenol orange by spectrophotometry 75
– sepn. of – as citrate complex by extr. with Aliquat 336S 75
Search strategies
– data banks in spectrometry, –, AES, NMR, proton-NMR, IR spectra 714
Secoiridoid glycosides
– sepn. of – from plant extracts by reversed-phase HPLC 191
Sedimentary rocks
– detmn. of hydrocarbons in – by GC, thermo-desorption unit as injection device 186
– detmn. of tungsten and molybdenum in – by polarography 186
Sediments
– detmn. of selenium in plankton and – by hydride AAS 82
– detmn. of trace heavy metals in river – and sewage sludges by electrothermal AAS 188
– environmental analysis, airborne particulates, soils, –, rain, sea and river water, organic matter 662
Selectivity
– spectrometry, atomic emission, background correction, concept of –, practical resolving power, instrumentation for high spectral resolution 397
– spectrometry, X-ray, energy-dispersive, state and trends, –, sensitivity, limit of detection, comparison with wavelength-dispersive XRS 825
Selenium
– detmn. of arsenic and – in butter and polythenes by oxygen bomb combustion 86
– detmn. of – in foods and biological materials by fluorimetry, a validation study 86
– detmn. of – in plankton and sediments by hydride AAS 82
– detmn. of – using a chromatographic detector based on isotope cluster 176
Selenium
– sepn. of tellurium from – by extr. chromatography with tributylphosphate coated silicagel 177
Seminal plasma
– detmn. of carbohydrates, organic acids and sugar alcohols in – by HPLC 198
Semi-xylenol orange
– detmn. of scandium using – by spectrophotometry 75
Sensitivity
– spectrometry, X-ray, energy-dispersive, state and trends, selectivity, –, limit of detection, comparison with wavelength-dispersive XRS 825
Sensors, optical
– remote and in-situ analysis, process control, use of selective –, optrodes 618
Sensors, optical fibre
– chemical – combined with spectrophotometry, ion-exchange, chromatography, HPLC and flow-injection analysis 372
– specific detmn. with chemical –, process control 372
Sewage effluents
– detmn. of nitrogen in sewage sludges, –, new catalysts for Kjeldahl method 189
Sewage sludges
– detmn. of nitrogen in –, sewage effluents, new catalysts for Kjeldahl method 189
– detmn. of trace heavy metals in river sediments and – by electrothermal AAS 188
Signal/noise ratio
– spectrometry, atomic, improving – by cross correlation techniques, autocorrelation function, anal. strategy 507
Silica
– plasma for special applications, purification of silicon, purification of – for optical fibres, spectrometry, emission 384
– sepn. of microamounts of fluoride coexisting with large amounts of alumina and –, geological materials by TMS distillation 186
Silica surfaces
– quant. FAB mass spectrometry of silylated – 67
Silicates
– anal. of – by chromatography, ion-exchange, new scheme 43
Silicon
– detmn. of nitrogen and carbon in – by photon activation 184
– plasma for special applications, purification of –, purification of silica for optical fibres, spectrometry, emission 384
Silicon dioxide
– X-ray photoelectron spectroscopy of thermally treated – surfaces 184
Silicon layers
– detmn. of trace carbon in – by secondary ion mass spectrometry, on-line ion implantation 184
Silver
– behavior of mixed metal sulfide/silver sulfide sensing materials in solutions of – ions 74
– detmn. of – traces in some metals by voltammetry 182
Silver halide
– anal. of foreign complex ions in – crystals 120
Simplex algorithms
– comparison of – 175
Simplex optimization
– , method with more than one vertex per cycle 59
Sludges
– X-ray fluorescence analysis in agricultural chemistry, plants, feeds, fertilizers, soils, –, water and others 720
Sodium
– detmn. of potassium, –, calcium and magnesium in dialysis fluid by capillary isotachophoresis 94
Sodium tetrahydroborate
– detmn. of – in air by coulometric titration 80
Software catalogue
– chemistry, book 63
Soils
– anal. of pesticides in – by TLC, movement and leachability 85
– anal. of – using electrodes, ion-selective 85
– detmn. of atrazine, lindane, pentachlorophenol and diazinon in water and – by isotope dilution GC/MS 85
– detmn. of phenylurea herbicides in – by HPLC with electrochem. detection 192
– environmental analysis, airborne particulates, –, sediments, rain, sea and river water, organic matter 662
– X-ray fluorescence analysis in agricultural chemistry, plants, feeds, fertilizers, –, sludges, water and others 720
Solvents
– detect. of – and gases in toxicology by GC 231
Sorbinil
– HPLC of glucose, fructose, sorbitol and – in human lens and blood plasma 198
Sorbitol
– HPLC of glucose, fructose, – and sorbinil in human lens and blood plasma 198
Spectral interferences
– in AES, multiplicative, straylight, software and hardware treatment, sources, review 397
Spectrochemical analysis
– of geological materials, application and role 707
Spectrochemical methods
– for multicomponent analysis, assessment by information theory, information content and efficiency optimization, precision 525
Spectroelectrochemistry
– at twin interdigitated electrodes 172
– extended X-ray absorption fine structure thin-layer – 65
Spectrometry
– data banks in –, search strategies, AES, NMR, proton-NMR, IR spectra 714
– surface analysis, current capabilities, –, AES, XPS, ESCA, XRF, SIMS and ISS 728
Spectrometry, atomic
– anal. of environmental materials by –, graphite furnace AAS, ICP-AES, colorimetry 531
– elemental analysis of biological materials by –, flame, furnace and plasma based methods, sample preparation 463
– hollow cathode lamps as excitation sources for analytical –, intensity enhancement using magnetic fields, additional radio frequency and microwave power, pulsing 442
– , improving signal/noise ratio by cross correlation techniques, autocorrelation function, anal. strategy 507
– nebulization effects in analytical – 64
Spectrometry, atomic absorption
– , multielement anal. with N_2O-enriched air-acetylene flame 64
– potential of flow-injection analysis for – and spectrometry, ICP, sample injection, automation 745
– theory of flame –, atomisation of platinum metals 64
Spectrometry, atomic absorption, electrothermal
– , factors influencing the free oxygen content in an electrothermal atomizer 64
Spectrometry, atomic absorption, graphite furnace
– equilibrium, thermodynamic, model for atomization in –, influence of O_2 in Ar purge gas 448
– , studies on GF operation, heating rate, L'vov platform, atom formation, matrix interference and modification 807
– , tube reactivity, vaporization equilibrium, desorption and vaporization processes, atomization mechanisms 807

Spectrometry, atomic absorption, hydride-generation
– atomization mechanisms in – 832
Spectrometry, atomic absorption, molecular
– , formation of stable molecules in graphite furnace, interferences due to absorption, emission and fluorescence processes 497
Spectrometry, atomic emission
– , background correction, concept of selectivity, practical resolving power, instrumentation for high spectral resolution 397
– with Grimm-type glow discharge lamp, comparison of argon, neon and nitrogen gases 64
Spectrometry, atomic fluorescence
– , interferences in continum source excited flame 65
Spectrometry, Auger electron
– depth profile analysis of tungsten carbide coatings by –/sputtering 111
Spectrometry, emission
– plasma for special applications, purification of silicon, purification of silica for optical fibres, – 384
Spectrometry, ESR
– , high-pressure measurement with helix resonator 66
Spectrometry, flame atomic
– aerosols in –, cascade impaction technique, spray chamber, aerosol ionic redistribution interference 846
– , prim., sec., tert. aerosols, nebulization efficiency, drop size distribution, votalization interference 846
Spectrometry, FTIR
– anal. of iron ores by computerized – 185
– anal. of surface layers by –, lower limit of thickness 65
– chromatography, HPLC/–, interface with KCl substrate 171
– chromatography, HPLC/– with attenuated total reflectance flow cell 171
– negative chemical ionization and accurate mass measurements for a linked system chromatography, gas/–/mass spectrometry, FT 839
– , spectrometry, IR, laser for molecules, unstable, matrix isolation, liquid noble gases solvents, time-resolved studies 819
– spectrometry, IR of surface by diffuse reflection, reflection absorption, emission, –, charact. of monolayers, IR spectra of adsorbates 571
– surface analysis by –, reflection and polarization (modulation) 571
Spectrometry, ICP
– direct sample introduction system for –, detection in microcolumn chromatography, liquid 171
– , low power, physical principles and analytical performance in terms of detection limits, stability and freedom of interferences 472
– , overview 511
– potential of flow-injection analysis for spectrometry, atomic absorption and –, sample injection, automation 745
Spectrometry, ICP-AES
– comparitive studies of spectrometry, ICP-MS and –, anal. performance, instrumentation, physical bases, interferences 561
– , multielement anal. electrothermal vaporization 64
Spectrometry, ICP-MS
– comparitive studies of – and spectrometry, ICP-AES, anal. performance, instrumentation, physical bases, interferences 561
Spectrometry, ICP-OES
– multielement analysis of environmental samples by spectrometry, X-ray fluorescence, total reflection, activation analysis, neutron and – 662
Spectrometry, IR
– for measurement of trace gases in air, air pollution and atmosphere, upper using ballon-borne spectrometer and long path cells 579
– for molecules, unstable, detection, charact. and monitoring 819
– industrial application of – and spectrometry, Raman, in-situ anal., microprobe anal., Fourier transform IR and Raman spectrometry 537
– of biological materials, proteins, lipids, carbohydrates, nucleic acids, relevant studies 655
– of surface by diffuse reflection, reflection absorption, emission, spectrometry, FT-IR, charact. of monolayers, IR spectra of adsorbates 571
– standard deviation in anal. of insecticides by – and spectrophotometry, UV 74
Spectrometry, IR, laser
– spectrometry, FT-IR, – for molecules, unstable, matrix isolation, liquid noble gases solvents, time-resolved studies 819
Spectrometry, laser-induced molecular
– high resolution –, excitation spectroscopy or resonant two-photon ionization spectroscopy as detection techniques, sub-Doppler resolution 479
– high resolution –, rotational temperatures, simplification of complex molecular spectra, Rydberg states, spectroscopy, optical-optical double resonance 479
Spectrometry, laser, intercavity
– detmn. of lanthanides in solution by – 76
Spectrometry, molecular nonthermal emission
– , anal. possibilities of laser excited molecular fluorescence combined with electrothermal evaporation, trace analysis 497
Spectrometry, NIR
– , unique-sample selection via spectral subtraction 65
Spectrometry, NMR
– anal. of fossil fuels by –, high-resolution solution NMR, high-resolution solid-state NMR, 2-dimensional NMR, ^{13}C-NMR, multi-nuclear methods 781
– , automated structure elucidation systems 750
– multidimensional –, structural and analytical applications 771
– NMR imaging, – in vivo, biochemical analysis, medical diagnosis 767
– of chemical compounds in the living organisms, ^{13}C-NMR, ^{31}P-NMR 767
– , pattern recognition in two-dimensional spectra 65
– quality control of foods by isotope ratio, mass spectrometry and – 760
– studies of enzymes by –, Fourier transform NMR, pulse techniques, 2-dimensional methods, high resolution studies 437
Spectrometry, NMR, ^{19}F
– anal. of proteins by –, p-fluorobenzenesulfonyl chloride as reagent 197
Spectrometry, optical atomic emission
– multielement analysis of metals, alloys, steel by –, spark source, arc source, d.c. arc, review 793
Spectrometry, optical emission
– application of – in geochemistry 707
– , DC-arc as radiation source, comparison with ICP and glow discharge for anal. of solid samples 519
– , DC arc as radiation source, fundamental properties, improvement and development, matrix effects 698
Spectrometry, PIXE
– , state of the art, applications in geological analysis, biochemical analysis, clinical analysis and environmental analysis 635
Spectrometry, plasma, analytical inductively coupled
– , anal. performance charact., power of detection, scope of application 511
– , ICP as atomization source for atomic fluorescence, as excitation source for atomic emission, as ionization source for MS 511
Spectrometry, Raman
– industrial application of spectrometry, IR and –, in-situ anal., microprobe anal., Fourier transform IR and Raman spectrometry 537
– , new developments 642
Spectrometry, Raman, linear
– microsampling in –, SERS 642
Spectrometry, Raman, non-linear
– CARS and IDSRS in – 642
Spectrometry, X-ray
– , application of total reflexion and polarized X-rays, improvement of limit of detection 865
– , past, present and future 492
Spectrometry, X-ray, energy-dispersive
– , fundamental parameter method, influence coefficients method, matrix correction, multi-element analysis 825
– , state and trends, selectivity, sensitivity, limit of detection, comparison with wavelength-dispersive XRS 825
– , synchrotron radiation, total reflection, polarized X-rays, excitation-detection geometry, secondary fluorescence 825
Spectrometry, X-ray fluorescence
– anal. of cobalt alloys by –, matrix effect correction 183
– detmn. of trace elements in geochemical materials and environmental materials by –, equation for matrix correction 27
– synchroton radiation as source for – 786
– , wavelength dispersive, sensitivity, accuracy, excitation, dispersion, detection, computer control in XRFS 492
Spectrometry, X-ray fluorescence, total reflection
– multielement analysis of environmental samples by –, activation analysis, neutron and spectrometry, ICP-OES 662
Spectrophotometry
– , calculation of selectivity index 64
– chemical sensors, optical fibre combined with –, ion-exchange, chromatography, HPLC and flow-injection analysis 372
Spectrophotometry, derivative
– application of – to anal. of substances in solutions of complex composition, review 64
Spectrophotometry, UV
– standard deviation in anal. of insecticides by spectrometry, IR and – 74
Spectroscopy
– application of – in archeology, lists of methods, materials and investigated areas of interest 875
Spectroscopy, coherent forward scattering
– trace analysis by –, Faraday effect, Voigt effect 612
Spectroscopy, ESCA
– , spectroscopy, photoelectron, microscopy, SAM and SIMS of metals 625
– surface analysis of polymers and catalysts by mass spectrometry, laser, secondary ion mass spectrometry, LAMMA and – 589
Spectroscopy, ionization
– fluorimetry, laser and –, theoretical and analytical considerations for pulsed sources 683
Spectroscopy, optical-optical double resonance
– high resolution spectrometry, laser-induced molecular, rotational temperatures, simplification of complex molecular spectra, Rydberg states, – 479

Spectroscopy, photoelectron
– spectroscopy, ESCA, –, microscopy, SAM and SIMS of metals 625
Spectroscopy, photothermal
– in surface analysis and analytical chemistry 456
– , radiationless deexcitation by acoustic wave generation, applications, photothermal effects, generation and detection 456
Staining reagents
– new – for proteins on polyacrylamide 263
Standard reference materials
– , biological reference materials, glass reference materials, application, development, homogeneity, directory 376
– evaluation of anal. interlaboratory comparison and certification of – 175
– in clinical analysis, environmental analysis and nutritional, agricultural and industrial analytical chemistry 376
Steel
– anal. of corrosion and oxidation, surface analysis of –, Cr-Ni alloys and metals by spectrometric methods, depth profiles 625
– detmn. of arsenic in – and cast iron by hydride AAS 183
– multielement analysis of metals, alloys, – by spectrometry, optical atomic emission, spark source, arc source, d.c. arc, review 793
Steroids
– detmn. of – and uric acid by mass spectrometry, isotope dilution as reference methods 208
Steroid sulfates
– sepn. of – from blood plasma by extraction with benzyltributylammonium chloride 289
Strontium
– sepn. of uranium(VI), aluminum, –, barium and mercury(II) by cation exchange chromatography in aqueous ammonium acetate 66
Structure elucidation
– of organic compounds, automated system, computer-assisted, CHEMICS 750
Sugar alcohols
– detmn. of carbohydrates, organic acids and – in seminal plasma by HPLC 198
Sugars
– anal. of – in glycoproteins by HPLC 198
Sulfate
– detmn. of – in water with barium-beryllon II by spectrophotometry 82
– titration of – with barium using Ba-selective electrode 79
Sulfide
– detmn. of – with $K_3Fe(CN)_6$] by titration with natrium nitroprusside as indicator 79
Sulfur dioxide
– detmn. of – in hop and beer by gas-adsorption chromatography 86
Sulfur isotopes
– fraction. of – between hydrogen sulfide gas and sulfur containing aqueous solutions 130
Sulfurorgano compounds
– preconc. of – from water with Amberlite and Chromosorbs 189
Superacids
– , book 63
Suramin
– detmn. of – in blood serum by isocratic HPLC sepn. 356
Surface
– spectrometry, IR of – by diffuse reflection, reflection absorption, emission, spectrometry, FT-IR, charact. of monolayers, IR spectra of adsorbates 571
Surface analysis
– anal. of corrosion and oxidation, – of steel, Cr-Ni alloys and metals by spectrometric methods, depth profiles 625
– by spectrometry, FT-IR, reflection and polarization (modulation) 571
– , current capabilities, spectrometry, AES, XPS, ESCA, XRF, SIMS and ISS 728
Surface analysis
– of materials technology within a computer industry, overview 426
– of polymers and catalysts by mass spectrometry, laser, secondary ion mass spectrometry, LAMMA and spectroscopy, ESCA 589
– spectroscopy, photothermal in – and analytical chemistry 456
Surface layers
– anal. of – by spectrometry, FT-IR, lower limit of thickness 65
Synchroton radiation
– as source for spectrometry, X-ray fluorescence 786
Synovial fluid
– detmn. of xylosyltransferase in – and blood plasma 311

T

Tandalum(V)
– detmn. of – with N-arylhydroxamic acids by extr.-spectrophotometry 77
Technetium
– detmn. of – based on quenching of the fluorescence of some organic compounds 77
Tellurium
– sepn. of – from selenium by extr. chromatography with tributylphosphate coated silicagel 177
Teniposide
– computerized dynamic voltammetric detection in chromatography, HPLC, etoposide and – 68
Tensides
– detmn. of –, alkylsulfates and alkylsulfosuccinates by chromatography, reversed phase, ion-pair 154
Terbium
– detmn. of erbium, – and dysprosium with xylenol orange by amperometric titration 76
– detmn. of – in yttrium oxide in presence of Ho and Er 184
Terodiline
– detmn. of – in blood serum by flow-injection extr. and GC 101
Terpenes
– detmn. of – in plant materials by GC, after extr. with ethanol 84
Tetrachlorodibenzo-p-dioxin
– detmn. of – in trichlorophenoxyacetic acid by capillary GC 193
Tetracyanoquinodimethane
– detmn. of antihistamines with – by spectrophotometry 90
Tetracycline
– detmn. of – and oxytetracycline by pH-induced difference spectrophotometry 91
– kinetic detmn. of – and oxytetracycline using spectrophotometry 91
Tetracyclines
– detmn. of – pure and in pharmaceuticals, molybdenum blue method 91
Tetraphenylborate
– detmn. of iron with 2,4,6-tris(2′-pyridyl)-s-triazine and – by spectrophotometry 178
Thallium
– detmn. of – in bismuth by DPASV 182
Theophylline
– detmn. of –, caffeine and phenobarbital in blood plasma by HPLC 102
– detmn. of – in blood plasma by HPLC 102
– detmn. of – in blood serum, photom. 352
– detmn. of – in human physiological fluids by HPLC, column switching 327
Thermal analysis
– in forensic science 93
Thiamine
– detmn. of – and its phosphate esters in blood by HPLC 98
Thiocyanate
– effect of barbituric acid in detmn. of cyanide and – by pyridine-barbituric acid method 78
Thioethers
– detmn. of ampicillin, ranitidine, – in blood plasma by HPLC with on-line generated bromine 103
6-Thioguanine
– monitoring of chem. destruction of 6-mercaptopurine, – and melphalane 91
Thiohydantoins
– sepn. of amino acids as – by HPLC 95
Thiomalic acid
– detmn. of osmium(VIII) with – by amperometric titration 77
Thorium
– detmn. of – in sea water by NAA 190
Thorium ores
– detmn. of lanthanides in – by X-rays in NAA 185
Thromboxanes
– detmn. of hydroxy fatty acids, – and prostaglandins by isotope dilution, GC/MS 199
Thyme
– anal. of – by GC, extr. with liquid CO_2 89
Thymidylyl-thymidine
– photoreaction products of – 283
Thyrotropin
– detmn. of neonatal – in blood by fluoroimmunoassay 267
– detmn. of neonatal – in blood by immunometric assays 268
Thyroxine
– detmn. of – in blood serum by HPLC 318
Tinorgano compounds
– Gmelin handbook, –, Part 12 168
Tissues
– assay of inosine-5′-monophosphate dehydrogenase in – by electrophorese 100
– assessment of non-esterified fatty acids and phosphoglycerides in myocardial – by silica gel column chromatography 199
– detmn. of UDP-glucose in cells and – by isocratic HPLC 337
– microassay of glycosaminoglycans and proteoglycans in – 96
– NMR studies of enzymes, macromolecules, cells, –, listing of information 437
Tissues, animal
– detmn. of α-tocopherol in – by HPLC with UV detection 199
Titrations
– chlorophthalimide, N- as new oxidant for – 174
Tobacco
– detmn. of humectants in – by TLC 89
Tobacco blends
– differentiation of – by pyrolysis FI mass spectrometry and pattern recognition 9
α-Tocopherol
– detmn. of – in tissues, animal by HPLC with UV detection 199
– sepn. of three dimers of – by HPLC 88
α-Tocopherol acetate
– detmn. of – in soft capsules 92
Toxic elements
– screening for – in urine by sequential-scanning ICP-AES 94
Toxicological analysis
– for diagnosis 234
Toxicology
– anal. methods in human –, book 62
– clinical analysis, –, promotion by DFG 235
– detect. of solvents and gases in – by GC 231
– forensic and clinical – 230
Trace analysis
– and microanalysis by mass spectrometry, isotope dilution, thermal ionization, spark source, electron impact ionization, ICP, microwave induced plasma, comparison of accuracy 601
– by spectroscopy, coherent forward scattering, Faraday effect, Voigt effect 612

Trace analysis
– spectrometry, molecular nonthermal emission, anal. possibilities of laser excited molecular fluorescence combined with electrothermal evaporation, – 497
– , Vol. 4, book 169
Trace analysis, inorganic
– preconcentration techniques for –, votalization, LL-extr., precipitation, electrochem. deposition, sorption, ion-exchange, LC, flotation, freezing and zone melting 672
Trace elements
– detmn. of – in environmental samples, accuracy, reference materials 678
– detmn. of – in geochemical materials and environmental materials by spectrometry, X-ray fluorescence, equation for matrix correction 27
– detmn. of – in rain water by total-reflection X-ray fluorescence 81
– detmn. of – in water, preconc. by reductive precipitation with borohydride 81
– direct detmn. of – in milk by electrothermal AAS 85
Trace gases
– spectrometry, IR for measurement of – in air, air pollution and atmosphere, upper using ballon-borne spectrometer and long path cells 579
Trace metals
– detmn. of – in sea water by anion-exchange chromatography/spectrophotometry 81
– detmn. of – in seawater by ICP mass spectrometry 81
– preconcentration of – in natural water with a new hydrazone 81
– short-term stability of – in estuarine water samples 188
Tranilast
– detmn. of – in blood plasma by HPLC 195
Tranquilizers
– detmn. of – and antidepressants using 2,3-dichloro-5,6-dicyano-p-benzoquinone by spectrophotometry 90
Triazene-N-oxides
– detmn. of niobium in alloys with – by fluorimetry 77
Tricalciumaluminate hexahydrate
– , bondlengths and bondvalences from X-ray single-crystal reflexes 124
Trichlorophenoxyacetic acid
– detmn. of tetrachlorodibenzo-p-dioxin in – by capillary GC 193
Trichothecene mycotoxins
– anal. of – in foods by HPLC 88
Triglycerides
– detmn. of cholesterol and –, bovine control serum 290
– detmn. of – in fats and oils by capillary GC, phenylmethylsilicone stationary phase 87
– HPLC of – 216
Trimethylselenonium ion
– detmn. of – in urine by LC and NAA 194
2,4,6-Tris(2'-pyridyl)-s-triazine
– detmn. of iron with – and tetraphenylborate by spectrophotometry 178
Tropatepine
– sepn. of – in biological fluids by HPLC 102
Troxerutin
– detmn. of – in pharmaceutical products by reversed-phase HPLC 92
Tryptophan
– detmn. of – in biological materials by HPLC 95
Tungsten
– detmn. of – and molybdenum in sedimentary rocks by polarography 186
Tungsten carbide
– depth profile analysis of – coatings by spectrometry, Auger electron/sputtering 111
Tungsten trioxide
– detmn. of molybdenum trioxide and – in catalysts by Raman spectrometry 183

U

UDP-glucose
– detmn. of – in cells and tissues by isocratic HPLC 337
Ullmann's encyclopedia
– of industrial chemistry, Vol. 2 A, amines to antibiotics 168
Uranium
– detmn. of – and radium in phosphate rocks and phosphoric acid by radiometry and spectrophotometry 33
– potentiometric detmn. of free acidity in uranium(VI) and plutonium solutions and of – 184
Uranium(VI)
– potentiometric detmn. of free acidity in – and plutonium solutions and of uranium 184
– sepn. of –, aluminum, strontium, barium and mercury(II) by cation exchange chromatography in aqueous ammonium acetate 66
Uranium ores
– IR anal. of refined – 185
Urea
– detmn. of – in blood serum by pH-indicator method 94
Uric acid
– detmn. of creatinine and – in human blood serum by ID-HPLC 279
– detmn. of – in blood serum by HPLC, column switching 333
– detmn. of pseudouridine and – in urine and blood serum by HPLC 99
– detmn. of steroids and – by mass spectrometry, isotope dilution as reference methods 208
– electrochem. flow-through detmn. of – in blood serum 95
Urine
– anal. of proteins in – by electrophoresis, SDS-PAA 265
– assay of [^{14}C]felodipine metabolites in – by LC using bimodal column switching 102
– detection of mitoxantrone in blood plasma and – by HPLC 195
– detection of mustard gas, bis(2-chloroethyl) -sulfide in – by GC 104
– detmn. of 3-methoxy-4-hydroxymandelic acid in – 322
– detmn. of β-blockers in – by TLC 101
– detmn. of aminodarone and its N-deethyl metabolite in blood plasma, – and bile 194
– detmn. of analgesics in blood and – by TLC on resin Y_{29} 101
– detmn. of catecholamines in – by ion-exchange chromatography, glycylglycine derivatization 196
– detmn. of doxorubicin in – by flow injection anal./voltammetry 103
– detmn. of furasemide in blood plasma and – by HPLC 101
– detmn. of glycerol in blood serum and – by GC-MS 312
– detmn. of human growth hormone in – by sandwich enzyme immunoassay 98
– detmn. of hydralazine and metabolites in – by LC with electrochem. detection 102
– detmn. of ibuprofen in – by GC 194
– detmn. of kallikrein in – by bioluminescence enzyme immunoassay 266
– detmn. of magnesium in blood serum and – with xylidyl blue-1 by Cobas Mira Analyzer 297
– detmn. of metaldehyde in blood plasma and – by GC 94
– detmn. of methylhippuric acid in – by HPLC and isotachophoresis 95
– detmn. of nicotine and cotinine in – by GC 104
Urine
– detmn. of nicotine and cotinine in – by HPLC 104
– detmn. of oxalate in –, comparison of enzymatic and ion-chromatographic methods 303
– detmn. of oxpentifylline metabolites in – by HPLC 102
– detmn. of primaquine in whole blood and – by HPLC 103
– detmn. of prostaglandins in – 295
– detmn. of pseudouridine and uric acid in – and blood serum by HPLC 99
– detmn. of ribonuclease in – 310
– detmn. of trimethylselenonium ion in – by LC and NAA 194
– detmn. of vanillylmandelic acid and homo-vanillic acid in – by HPLC with electrochem. detection 95
– half-life of PGE-M in human – 97
– screening for toxic elements in – by sequential-scanning ICP-AES 94
– screening of diethylstilbestrol in bovine – by HPLC with UV detection 97

V

Vacuum distillation
– conc. of volatile compounds in water by – for GC 189
Vanadium
– detmn. of trace molybdenum and – in water, preconcentration, AAS, ICP-OES 298
– detmn. of – with carminic acid and cetyl-trimethylammonium chloride in metallurgical materials 183
– detmn. of – with salicylic acid by spectrophotometry 76
– sepn. of copper, cobalt, nickel, chromium and – chelates with 5-Br-PAPS by HPLC 178
Vanadium(II)
– strongly reducing agents in flow-injection analysis, chromium(II) and – 174
Vanadium(V)
– detmn. of – with 8-quinolinol by spectrophotometry, in the presence of nonionic surfactant 176
– kinetic detmn. of – with xanthine oxidase 176
Vanillylmandelic acid
– detmn. of – and homovanillic acid in urine by HPLC with electrochem. detection 95
Vegetables
– detmn. of ethyl parathion and methyl parathion in green – and surface water by HPLC 192
– detmn. of riboflavin in fruits and – by HPLC 87
Vitamin A
– detmn. of – in feeds by HPLC 85
Vitamin B_2
– detmn. of – in foods by LC, on line trace enrichment 87
Vitamin D
– solid phase extr. system for – and its major metabolites in blood plasma 199
Vitamin D_3
– extr. of – metabolites from blood plasma for HPLC and GC/MS 104
Vitamin E
– detmn. of – in biological materials by HPLC, review 1
Vitexine
– detmn. of – in pharmaceutical products, plant extracts by HPLC 92
Voigt effect
– trace analysis by spectroscopy, coherent forward scattering, Faraday effect, – 612
Volatile compounds
– anal. of – by GC-FTIR-MS 314
– anal. of – released by plants by capillary GC, dynamic headspace system 84

Volatile compounds
– conc. of – in water by vacuum distillation for GC 189
– detmn. of – in airborne particulates by GC, rapid sampling 79
Voltammetry
– study of hexachloroiridate(IV) by – at carbon paste electrodes 47

W

Wasp venom
– identification of pharmacologically active compounds in – 358
Waste water
– detmn. of alkylphenol polyethoxylates in – by HPLC 189
– detmn. of cadmium and zinc traces in – by spectrophotometry 187
– detmn. of dyes in – and gasoline by thermospray HPLC/MS 189
– detmn. of zinc in – in presence of cadmium by kinetic method 82
Water
– anal. of – by mass spectrometry, ICP 222
– anal. scheme for speciation of aluminum in natural – 188
– conc. of volatile compounds in – by vacuum distillation for GC 189
– detector, chemiluminescence for hydrogen peroxide in rain – 82
– detmn. of anions, inorganic and anions, organic in – by ion chromatography/UV detection 82
– detmn. of antimony in sea – by AAS with conc. of stibine in a graphite furnace 188
– detmn. of atrazine, lindane, pentachlorophenol and diazinon in – and soils by isotope dilution GC/MS 85
– detmn. of calcium in potable – with 2-(2-(8-hydroxyquinolyl)azo)-1-naphthol by spectrophotometry 187
– detmn. of calcium in – with hydroxynaphthol blue by flow injection anal. 187
– detmn. of chloride and fluoride in boronated – using ion-selective electrodes 187
– detmn. of chlorine dioxide in – by gas diffusion flow injection anal. 82
– detmn. of cobalt in – by AAS, preconc. on nitroso-R salt resin 188
– detmn. of copper(II) ultratraces in – by catalytic anal. 82
– detmn. of ethyl parathion and methyl parathion in green vegetables and surface – by HPLC 192
– detmn. of herbicides in – by solid-phase enzyme immunoassay 191
– detmn. of hydrocarbons, halogenated in – by GC with ECD 83
– detmn. of hydrocarbons, halogenated in –, preconc. at the ppt level 83
– detmn. of – in plant materials, extr. with DMSO instead of drying 84
Water
– detmn. of molybdenum(VI) in sea – after preconc. 188
– detmn. of nickel and cobalt in natural – and biological materials by chronopotentiometric stripping anal. 188
– detmn. of nitrates in – by second derivative UV spectrometry 187
– detmn. of organic bound heteroatoms in – 223
– detmn. of ozone in – by gas diffusion flow injection analysis 187
– detmn. of partially hydrolyzed polyacrylamide polymers in oil field production – 189
– detmn. of phenol traces in – by molecular-emission spectrometry 82
– detmn. of potassium in – by spectrophotometry 187
– detmn. of radioactive cobalt in –, solvent extr. and back-extr. with Bi(III) 184
– detmn. of sub-ng/ml levels of mercury in – by electrolytic deposition and EAAS 187
– detmn. of sulfate in – with barium-beryllon II by spectrophotometry 82
– detmn. of thorium in sea – by NAA 190
– detmn. of trace elements in –, preconc. by reductive precipitation with borohydride 81
– detmn. of trace elements in rain – by total-reflection X-ray fluorescence 81
– detmn. of trace metals in sea – by anion-exchange chromatography/spectrophotometry 81
– detmn. of trace metals in sea– by ICP mass spectrometry 81
– detmn. of trace molybdenum and vanadium in –, preconcentration, AAS, ICP-OES 298
– environmental analysis, airborne particulates, soils, sediments, rain, sea and river –, organic matter 662
– oxygen demand of –, COD and BOD 224
– pH-measurements in sea – using phenol red 186
– pH-measurements of – with glass electrode 186
– preconcentration in natural –, high-purity materials, element speciation 672
– preconcentration of trace metals in natural – with a new hydrazone 81
– preconc. of sulfurorgano compounds from – with Amberlite and Chromosorbs 189
– short-term stability of trace metals in estuarine – samples 188
– speciation of chromium in sea – 188
– titration of calcium and magnesium in – with EDTA, problems by high alkalinity 82
– total and group parameters for detmn. of organic substances in – 225
– X-ray fluorescence analysis in agricultural chemistry, plants, feeds, fertilizers, soils, sludges, – and others 720
Whey
– detmn. of ascorbic acid in milk and – by HPLC 88
Workplaces
– detect. of phenol and alkylphenols at – 142

X

Xanthates
– detmn. of nickel and palladium with – by extr. spectrophotometry 77
X-chromosomes
– anal. of – 272
X-ray absorption
– structure of catalysts, detmn. by extended – 786
X-ray fluorescence analysis
– in agricultural chemistry, plants, feeds, fertilizers, soils, sludges, water and others 720
X-ray microprobe
– phase boundaries with X-ray interference fields, polarization, –, X-ray absorption, X-ray absorption fine structure, standing X-ray wave fields 786
X-rays
– anal. application of total reflection and polarized –, radiation induced background, linear polarized X-rays for background reduction 865
X-ray single-crystal reflexes
– tricalciumaluminate hexahydrate, bondlengths and bondvalences from – 124
Xylenol orange
– detmn. of erbium, terbium and dysprosium with – by amperometric titration 76
Xylidyl blue-1
– detmn. of magnesium in blood serum and urine with – by Cobas Mira Analyzer 297
Xylosyltransferase
– detmn. of – in synovial fluid and blood plasma 311
– proteinases and – in inflammatory processes 227

Y

Yeast strains
– detmn. of amino acids in saccharomyces strains, – by GC 95
Yohimbine
– anal. of – in blood plasma by HPLC 196
Yttrium oxide
– detmn. of terbium in – in presence of Ho and Er 184

Z

Zinc
– detmn. of cadmium and – traces in waste water by spectrophotometry 187
– detmn. of calcium, –, manganese, iron, magnesium and phosphorus in feeds by ICP-AES 85
– detmn. of – in waste water in presence of cadmium by kinetic method 82
– detmn. of nickel, lead, – and copper in citrus leaves and rice flour by LC 86
Zircon
– anal. of – by mass spectrometry after microbial leaching 37
Zirconium
– detmn. of – by liquid-liquid extr. with tri-n-butylacetohydroxamic acid and spectrophotometry 76
